

Sensory Environments

Multisensory for everyone

experia
multisensory for everyone

Why Choose Experia

To make the process of choosing and installing your sensory environment as enjoyable, inspiring and as easy as possible, we offer the services of a dedicated sensory advisor who will be your key contact when discussing your new environment with us.

Whether you have a distinct idea of what you want your sensory environment to do and how it should look, or you're completely stuck for ideas, we can help.

Your knowledgeable sensory advisor will take the time to listen to you, and together you'll determine what you and your users need from your room, how best to meet those needs, and then ultimately, bring that vision to life.

They will guide you through every step of the process from design to purchase, installation to training and into the future with our aftercare programmes.

Our fabulous range of **sensory environments** and the help of a dedicated sensory advisor are just the start of what we have to offer.

It's simple to select your ideal environment using our unique Easy Guide tables

To make things as convenient as possible for you, we have created 5 easy to use package selection tables.

These allow you to select your ideal environment by type, sector, users' abilities, what you want to use the environment for, or the senses you're looking to target. See pages 10-17 to choose your perfect environment.

We can offer advice on the whole look of your environment

Sensory equipment is the main aspect of a sensory environment, but there are other considerations to make in order to really make it work. We can advise on the whole look of the room from wall colour, floor coverings, ceiling colour, heating, ventilation, storage, lighting levels, electrical plans and even the location of the room. See pages 94-97 for our 'Setting up a sensory environment' guide.

Our sensory environments suit every individual's needs and abilities

We listen to our clients' ideas and requests and design innovative products to meet these specific needs. We are passionate about inclusion and believe everyone should be able to access our products regardless of age or ability. This is why we promise that if we don't already do a product to suit your users' abilities, you can simply let us know and we'll design something new just for you!

We can install your sensory environment to the highest standard, anywhere in the world

Most of our sensory environments are designed to be really easy to fit. However if you want your room installed by the professionals, we are pleased to offer an expert installation service wherever you are in the world. Our knowledgeable engineers have experience installing thousands of miles from home and are happy to come to you so that you're confident everything is done just right.

Our sensory environments are built to last

To ensure peace of mind and because we are so sure of the quality of our products, we offer an industry first: extended warranty. All products manufactured by Experia have a 3 year warranty which can be extended to 5 years if required (at additional cost). We have many happy customers still using our future-proofed products after 12 years!

We provide comprehensive training

A sensory environment is a big investment, and the right room can change lives, so you'll want to use it to its full potential. Comprehensive training can be carried out by one of our experienced sensory trainers to keep your staff's practical knowledge up to date. Following completion of training, they will each be issued with a certificate to add to their record.

We provide aftercare packages which are second to none

We believe that maintenance involves both keeping the equipment running and ensuring that it's used correctly. Staff move on and the replacement staff can often be left behind with little or no knowledge of how to use your sensory environment. This is why our aftercare packages offer a Maintenance and Training Contract to ensure both your environment and your people are in tip-top condition.

6 Simple Steps...

Purchasing a sensory environment is as easy as 1, 2... 6.

1.

Inspiration

This brochure has been created to inspire you and show you the very best in sensory environments. The packages within have been developed so that you can visualise what your perfect environment will look like with ease. We've done the hard work, so you don't have to!

2.

Discussion

Your ideas and thoughts are crucial to the success of the new environment, so share them with us. You know the users of the environment and what you want to achieve from it, so let's work together to create the perfect room.

3.

Bringing your vision to life

Your experienced sensory advisor will recommend the package that's perfect for you based on your comments and discussions. They will send you a 3D plan of your room so that you can visualise your finished sensory environment.

4.

Building Blocks

It's time to order your new environment, so that our factory team can start crafting it, delivery can be arranged and installation can begin, whether you're using your own installers or ours. If you're using our engineers, we will send you a works method statement so you can be sure the equipment will be fitted safely, on time and on budget.

5.

Fulfilling Your Potential

To ensure you get the most out of your new environment, comprehensive training from one of our experienced sensory advisors can be requested. Following completion of training, staff will be issued with a certificate to add to their record. Alternatively, our online guides are a great way to get your environment up and running or provide a refresher.

6.

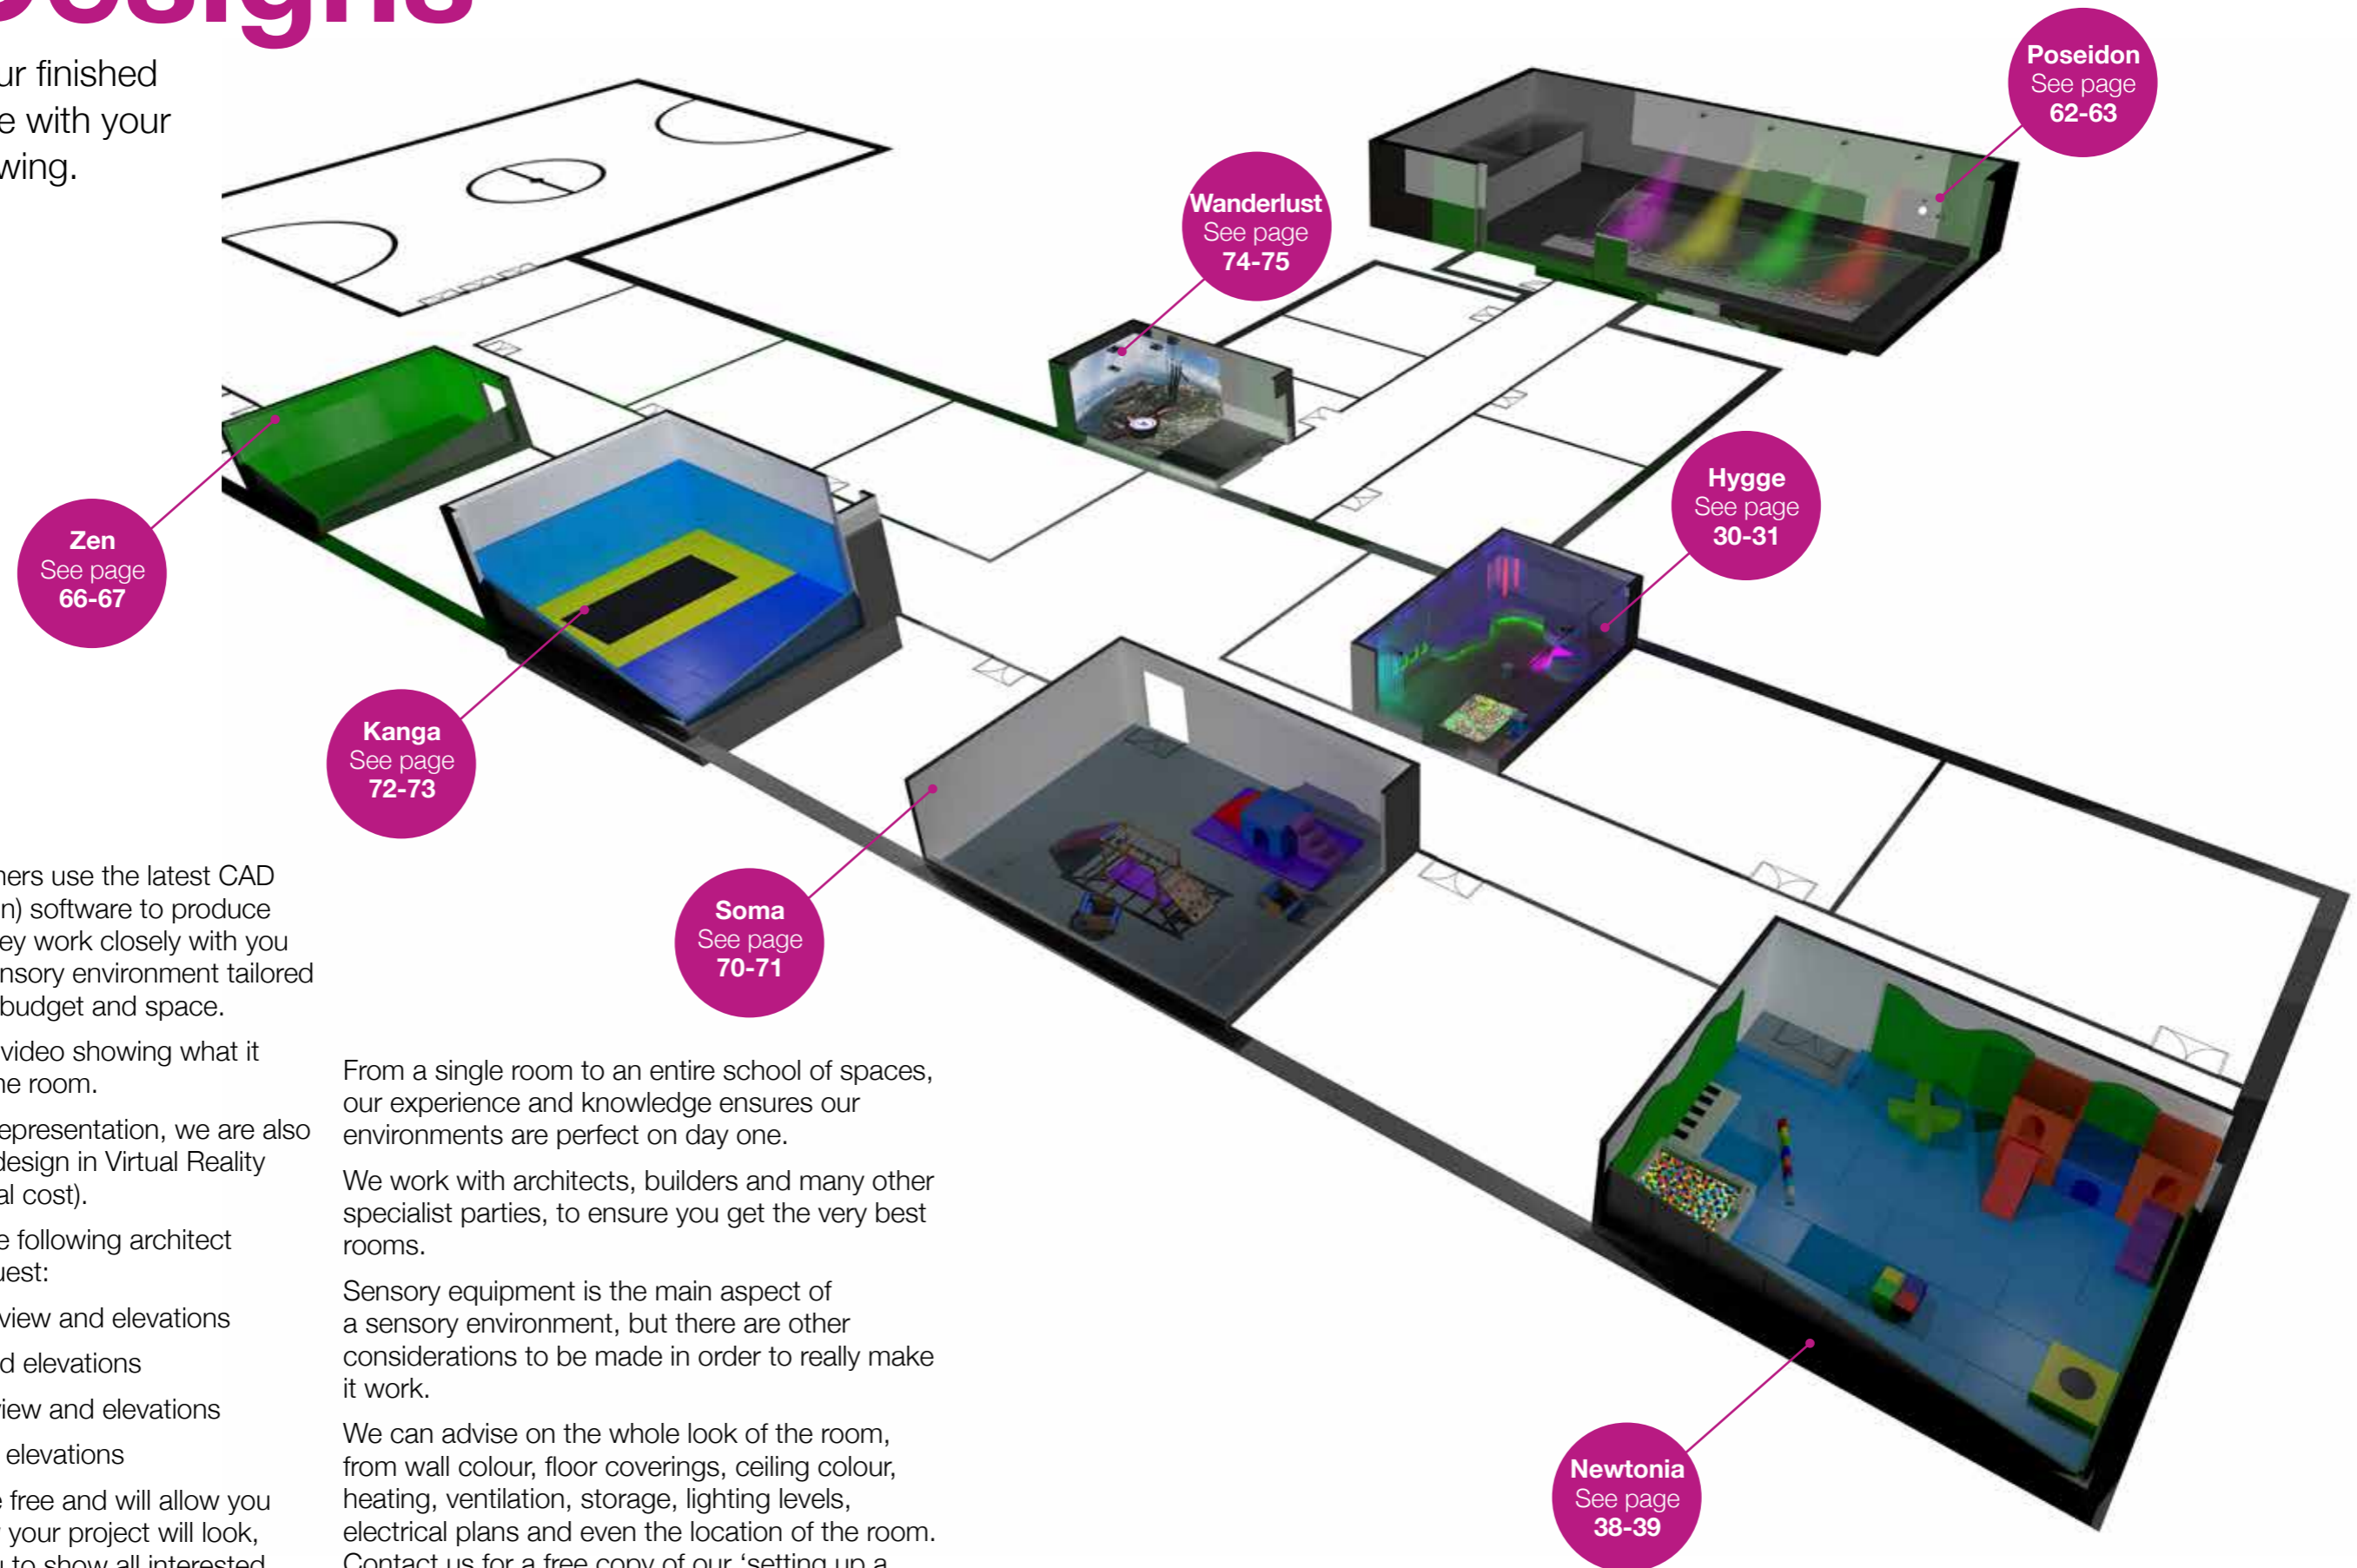

Continue to Enjoy!

We're hugely confident that you'll enjoy using your new environment, but you must remember to look after it. Like a car, there is a small amount of maintenance to do in every environment. Our online guides are a great reminder of what needs to be done and when. And why not give your environment a treat once in a while with a professional service visit from the experts at Experia?

3D Designs

Visualise what your finished space will look like with your own 3D CAD drawing.

Our experienced designers use the latest CAD (Computer Aided Design) software to produce stunning 3D visuals. They work closely with you to create the perfect sensory environment tailored to your specific needs, budget and space.

We can also offer a 3D video showing what it would be like to be in the room.

For the ultimate visual representation, we are also delighted to offer your design in Virtual Reality (VR) format (at additional cost).

We can also provide the following architect approved plans on request:

- Product location overview and elevations
- Electrical overview and elevations
- Specialist cable overview and elevations
- Patress overview and elevations

All of these services are free and will allow you to quickly visualise how your project will look, so that it is easy for you to show all interested parties what they can expect.

From a single room to an entire school of spaces, our experience and knowledge ensures our environments are perfect on day one.

We work with architects, builders and many other specialist parties, to ensure you get the very best rooms.

Sensory equipment is the main aspect of a sensory environment, but there are other considerations to be made in order to really make it work.

We can advise on the whole look of the room, from wall colour, floor coverings, ceiling colour, heating, ventilation, storage, lighting levels, electrical plans and even the location of the room. Contact us for a free copy of our 'setting up a sensory environment guide.'

The Easy Way...

...to choose your perfect sensory environment

We have created the following Easy Guide tables to help you choose the sensory environment that is perfect for your needs.

Choose by type of room, your sector, users' abilities, the purpose of the environment or the senses you want to target.

Once you have chosen a package please let us know and we can provide a 3D CAD plan to ensure it fits in your space.

Whilst we are confident these will provide you with all the information you need, your dedicated sensory advisor is always on hand to help.

Easy Guide Tables

We have created these easy to read tables to help you choose the sensory environment that is perfect for your needs.

Choose by type of room, your sector, users' abilities, the purpose of the environment or senses.

Uses

Choose your sensory environment based on how you wish to use it.

Our Sensory Packages

Utilizing over 30 years of experience and packed with the very latest technology from Experia, we are delighted to present 30 stunning packages offering life changing experiences to users regardless of age, ability or need. Enjoy!

Anguli

The sensory corner

The perfect place to start your sensory journey. Complete with stylish multi-level plinths on which to sit and enjoy the relaxing effects of the bubble tube, fibre optics, slowly rotating images and your choice of music.

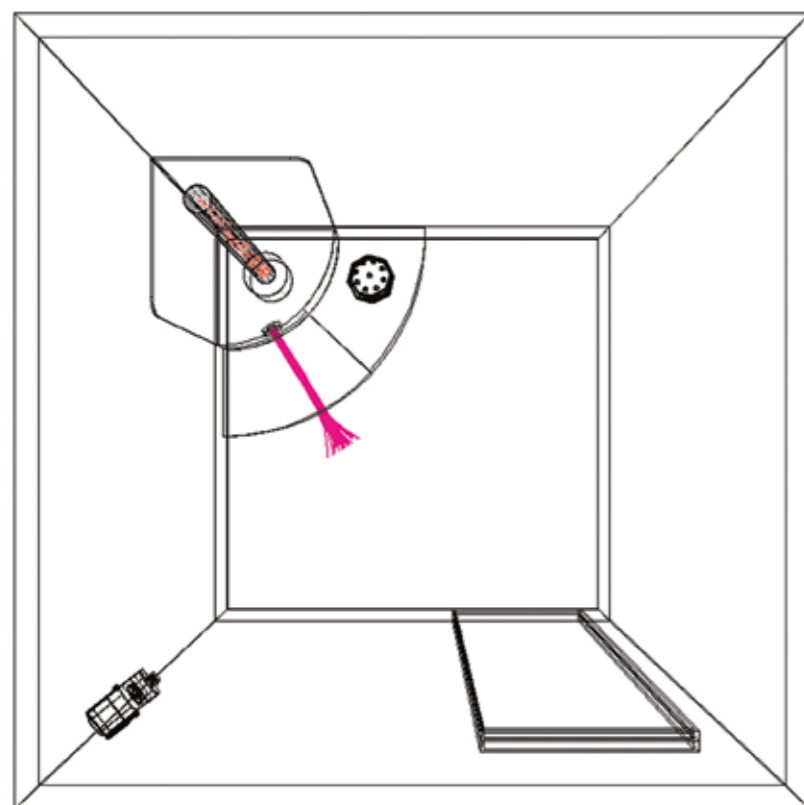

Users can interact with the colours in the room via the wireless Superactive controller, to develop a variety of life-skills such as cause and effect, switching skills and colour recognition.

The versatility of the Anguli means it can fit into most room types.

Uses

Cause and Effect, Colour Recognition, Development of Choice, Interaction & Relaxation, Social Interaction, Switching Skills.

For a full list of items included in this package, please see pages 76-83.

Pioppi

The interactive plinth

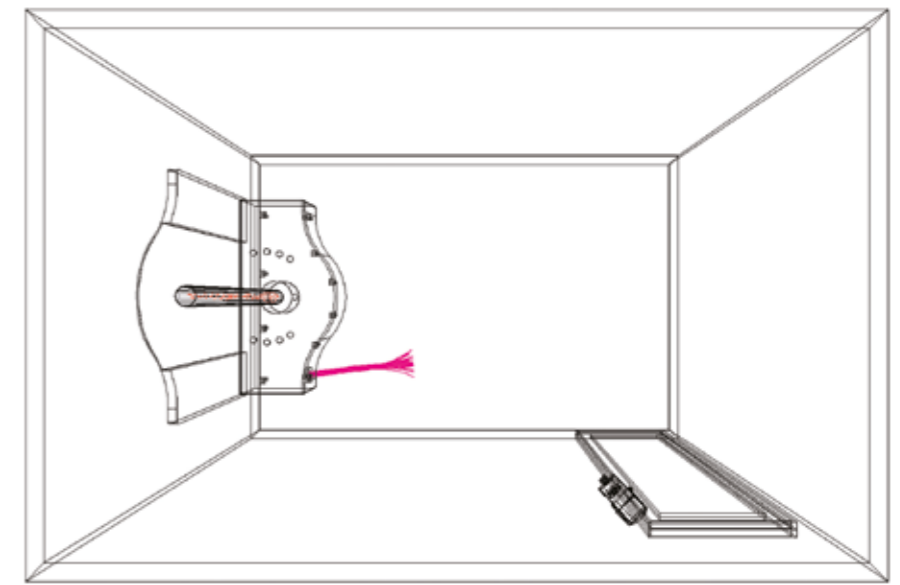

A compact, stylish plinth that boasts integral switches designed to develop life skills; this package is perfect for when space is tight or if you're looking to integrate sensory facilities into a multi-use room. Get up close to the bubble tube and feel its vibrations, or sit either side in pairs to work on colour recognition, turn-taking or social interaction skills.

The Pioppi can fit into any room regardless of its shape.

Uses

Cause and Effect, Colour Recognition, Development of Choice, Interaction & Relaxation, Social Interaction, Storytelling, Switching Skills, Theming, Turn-Taking.

For a full list of items included in this package, please see pages 76-83.

Wabi-Sabi

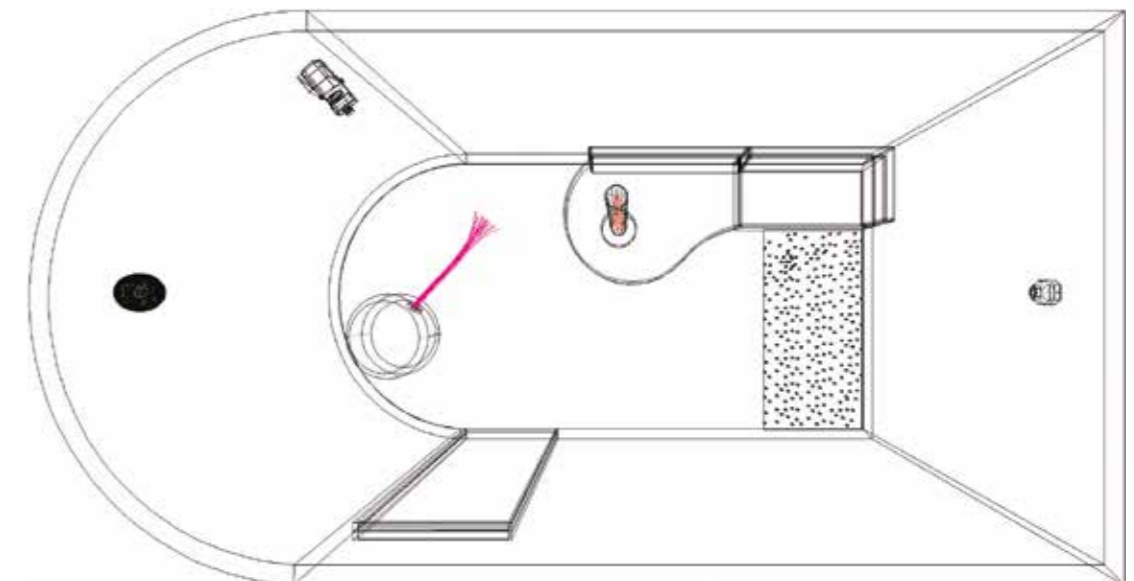

The calming sensory room

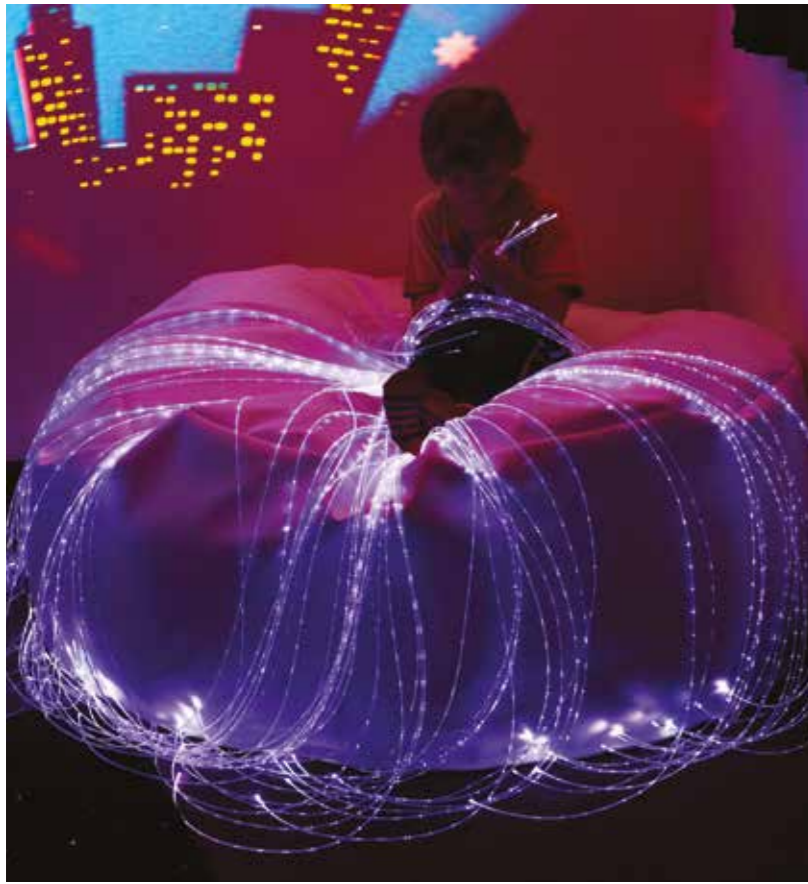

This safe haven is ideal for relaxation and de-escalation or just to process thoughts when life becomes overwhelming. The room features a choice of places to sit or lie, each with their own calming product with which to interact. Whether you prefer the stability of the specially designed bubble tube plinth, the cocooning effect of the fibre-optic softie, or the freedom of the floor and the fibre-optic carpet, the choice is yours.

Uses

Calming, De-escalation, Emotional Development.

For a full list of items included in this package, please see pages 76-83.

Ikigai

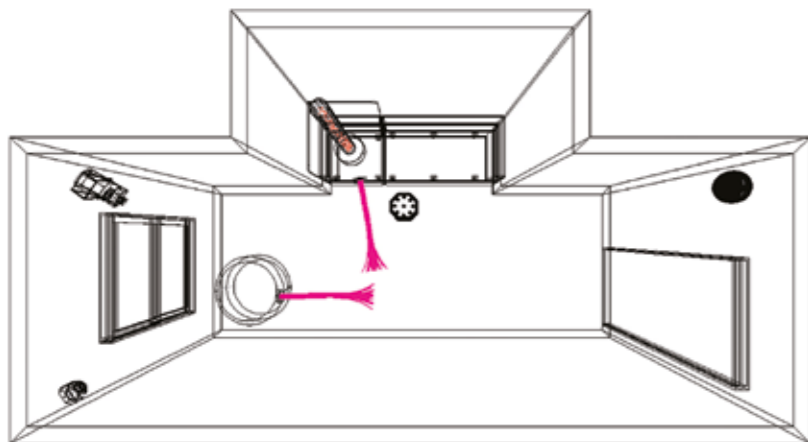

The premium interactive sensory room

Packed full with products, Ikigai provides users with the opportunity to influence their surroundings and start to learn valuable life skills. Use the durable wireless multi-button controllers individually to work on switching skills, cause and effect, colour recognition and motor control, or in pairs to encourage teamwork and turn-taking in this stimulating interactive environment.

Uses

Cause and Effect, Colour Recognition, Development of Choice, Fine Motor Skills, Interaction & Relaxation, Social Interaction, Storytelling, Switching Skills, Theming, Turn-Taking.

For a full list of items included in this package, please see pages 76-83.

Lagom

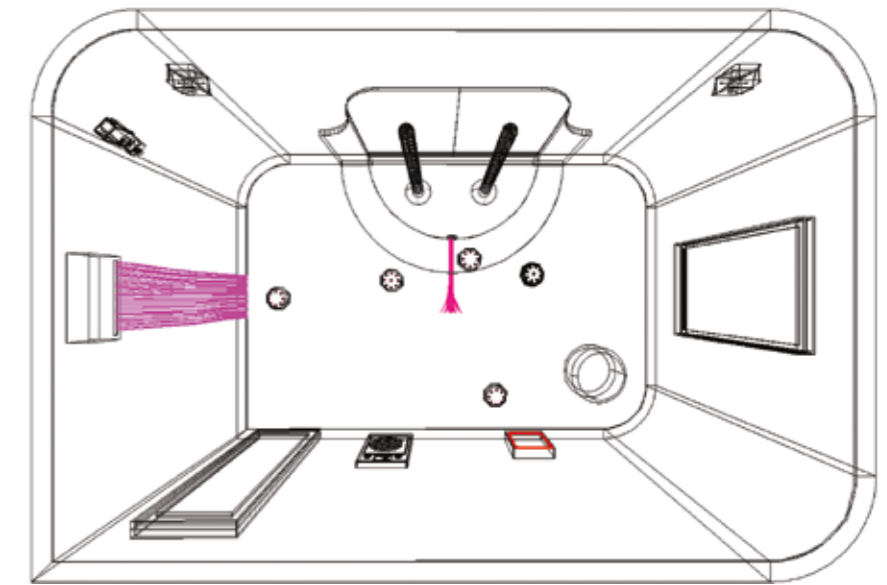

The intensive interactive sensory room

Step your multisensory experience up a level with the Lagom sensory environment, which introduces a wider range of interactive products in order to continue to inspire the imagination. Each item in the room comes with its own wireless controller to allow multiple users to develop essential life skills at the same time, whether that's working individually on their own goals simultaneously, or together in groups to encourage social interaction.

Uses

Cause and Effect, Colour Recognition, Development of Choice, Fine Motor Skills, Gross Motor Skills, Hand/Eye Coordination, Interaction & Relaxation, Shape Recognition, Social Interaction, Switching Skills, Theming, Tracking Skills, Turn-Taking.

For a full list of items included in this package, please see pages 76-83.

Hygge

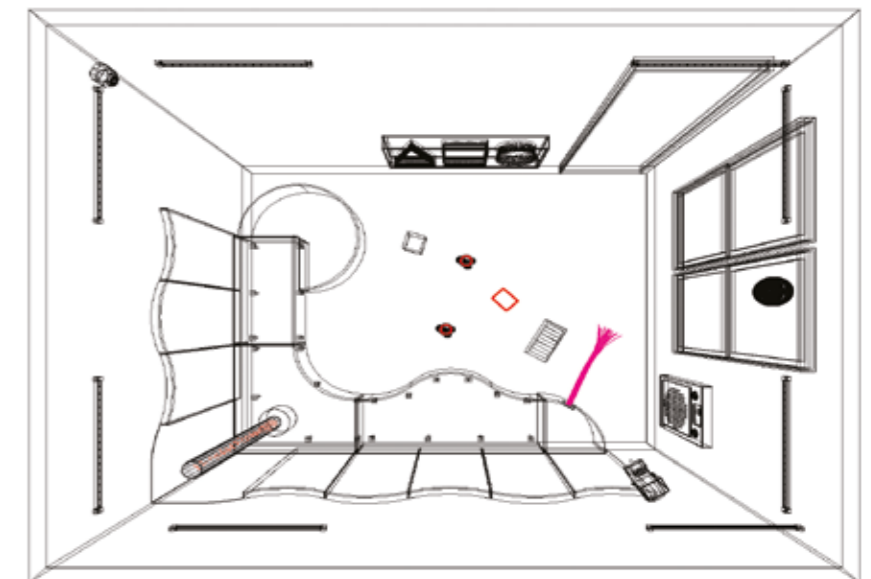

The professionals' IRiS sensory room

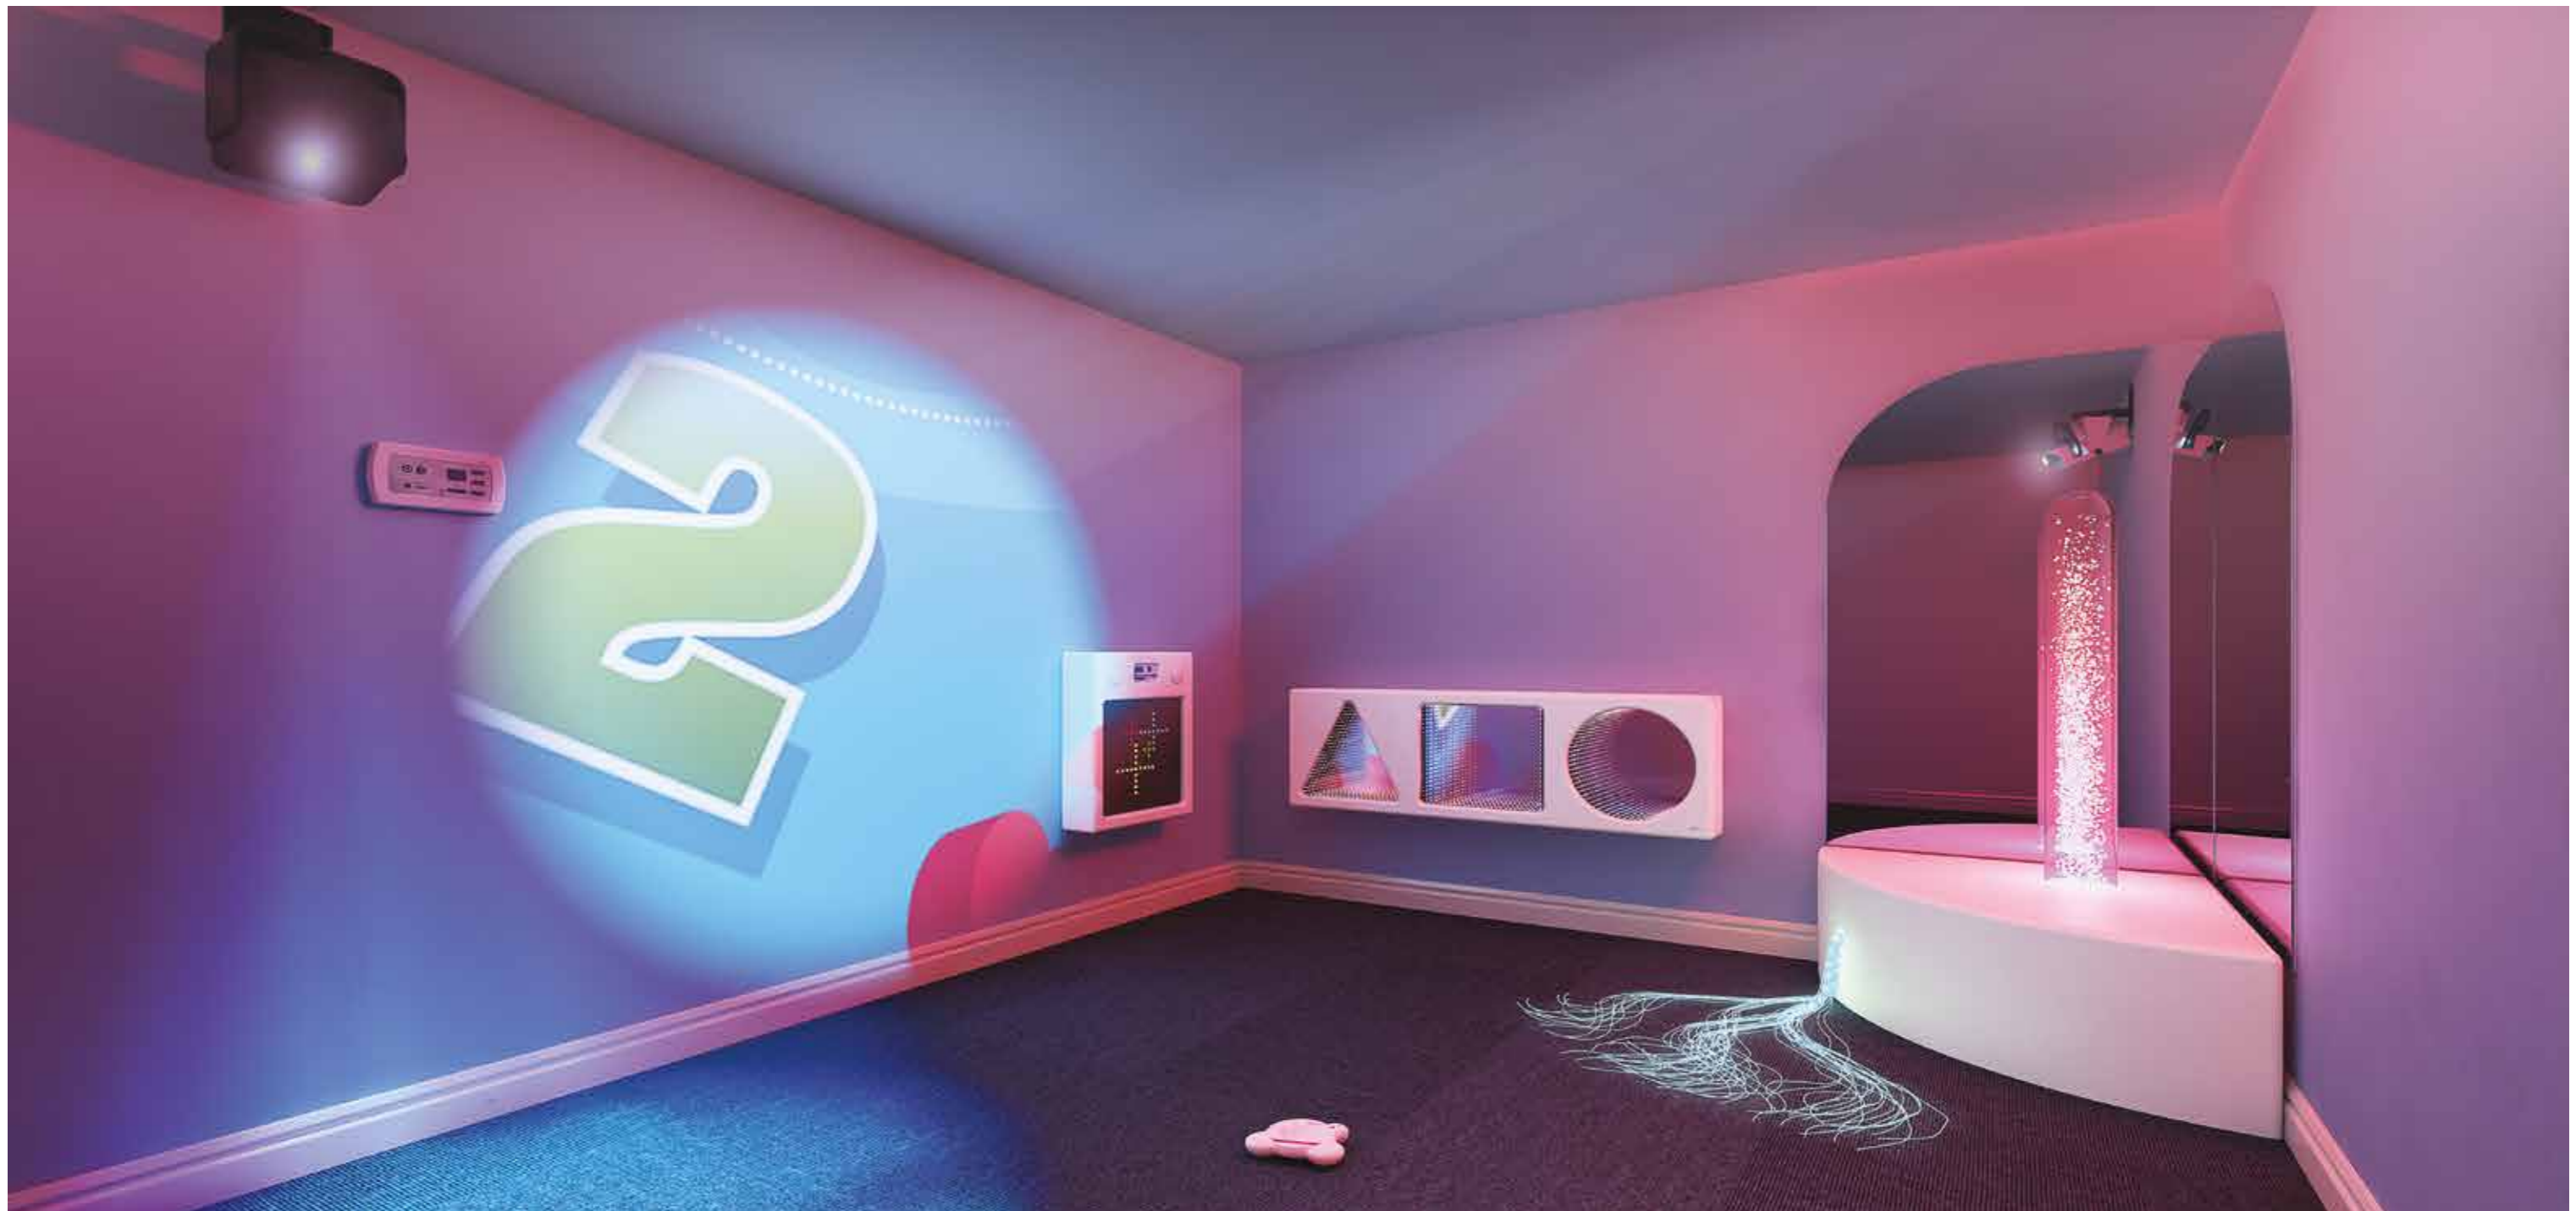

Loved by professionals worldwide, Hygge is truly unique. Featuring a range of IRiS multisensory equipment that allows anyone regardless of age or ability to control each and every piece of equipment through a range of specially designed wireless switches, each and every person gets a personalised reward so they are more willing to work. Easy to use and completely open-ended, products we build now will still be controllable from products we make in 2050!

Uses

Cause and Effect, Colour Recognition, Communication Skills, Concentration, Development of Choice, Fine Motor Skills, Gross Motor Skills, Hand/Eye Coordination, Interaction & Relaxation, Number Recognition, Shape Recognition, Social Interaction, Storytelling, Switching Skills, Theming, Tracking Skills, Turn-Taking.

For a full list of items included in this package, please see pages 76-83.

Lykke

The app-controlled sensory room

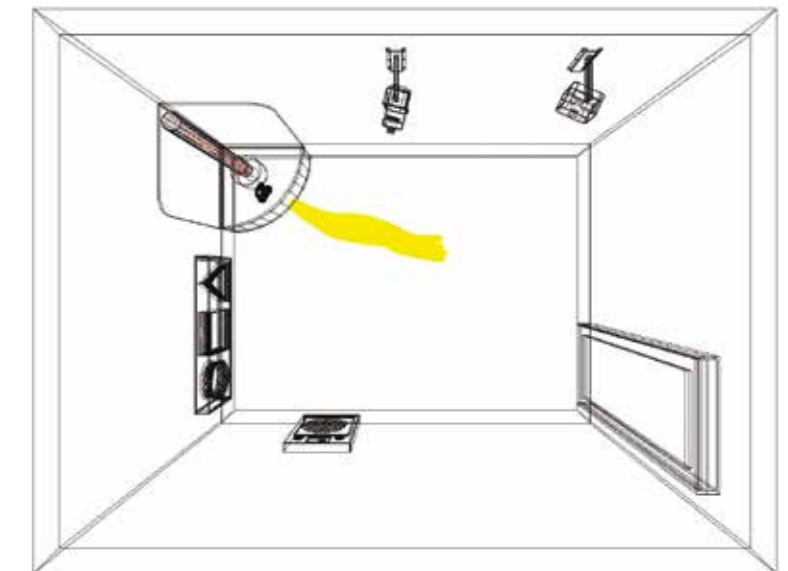

Control every product in the room wirelessly using your iPad or iPhone and our unique app (android app available soon).

The app features 12 different switching modes allowing the user to control the room via sound, touch, rotation and more. This is the ideal package to develop numerous life skills including colour recognition, vocalization, fine motor control and hand-eye coordination to name but a few.

Uses

Cause and Effect, Colour Recognition, Communication Skills, Concentration, Development of Choice, Fine Motor Skills, Hand/Eye Coordination, Interaction & Relaxation, Number Recognition, Shape Recognition, Social Interaction, Switching Skills, Theming, Tracking Skills, Turn-Taking.

For a full list of items included in this package, please see pages 76-83.

MiLE

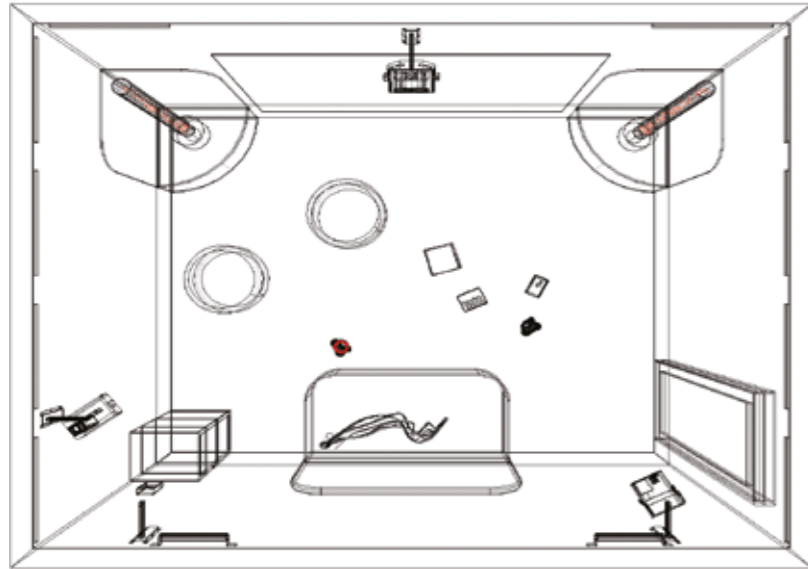

The controllable immersive sensory room

It's a calming sensory room, stimulating sensory room, and interactive sensory room - all rolled into one! The unique, ultimate controllable immersive experience, the user can wirelessly control the light, sound, vibration, fog, aromas and videos. The MiLE allows you to create scenarios on any theme to reward or calm a user. Create a reward that encourages a user to activate a switch or make a personalised theme designed to relax and calm.

Uses

Calming, Cause and Effect, Colour Recognition, Communication Skills, Concentration, De-escalation, Development of Choice, Distraction Therapy, Emotional Development, Fine Motor Skills, Gross Motor Skills, Hand/Eye Coordination, Interaction & Relaxation, Number Recognition, Physical Skills, Reminiscence, Shape Recognition, Social Interaction, Sound/Music Therapy, Storytelling, Switching Skills, Theming, Tracking Skills, Turn-Taking, Tactile.

For a full list of items included in this package, please see pages 76-83.

Ascendo

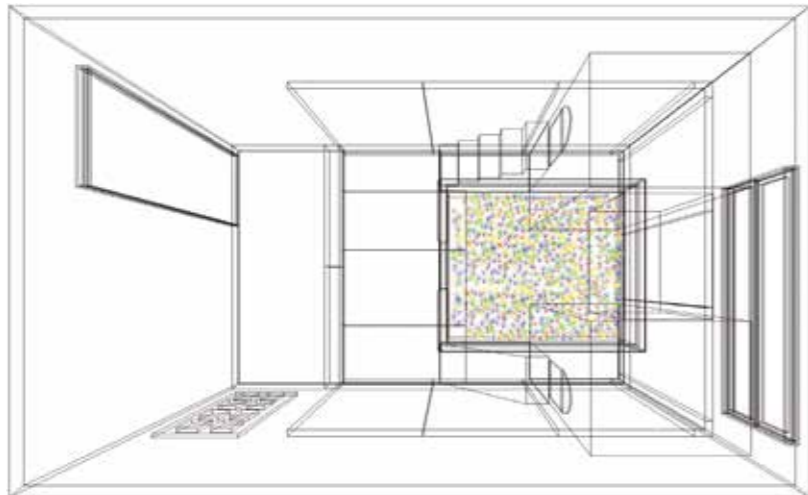

The fun soft play room

A fun and exciting way to develop gross motor skills in a tough hardwearing environment. This room has been designed to encourage the user to move in a variety of ways by going up, down, through, in and out. It's a great area to let off steam or work on life skills such as colour matching and balance. All Experia Soft Play is made to order in your choice of colours, please see pages 92-93.

Uses

Balance, Gross Motor Skills, Hand/Eye Coordination, Physical Skills.

For a full list of items included in this package, please see pages 76-83.

Newtonia

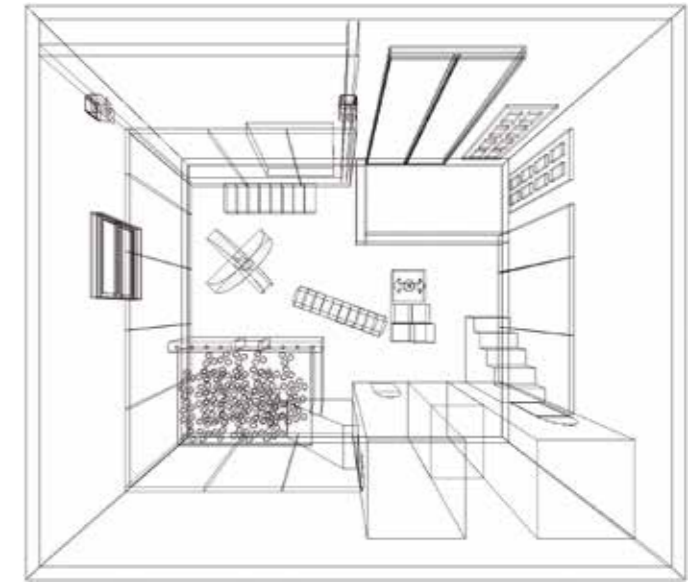

The challenging soft play room

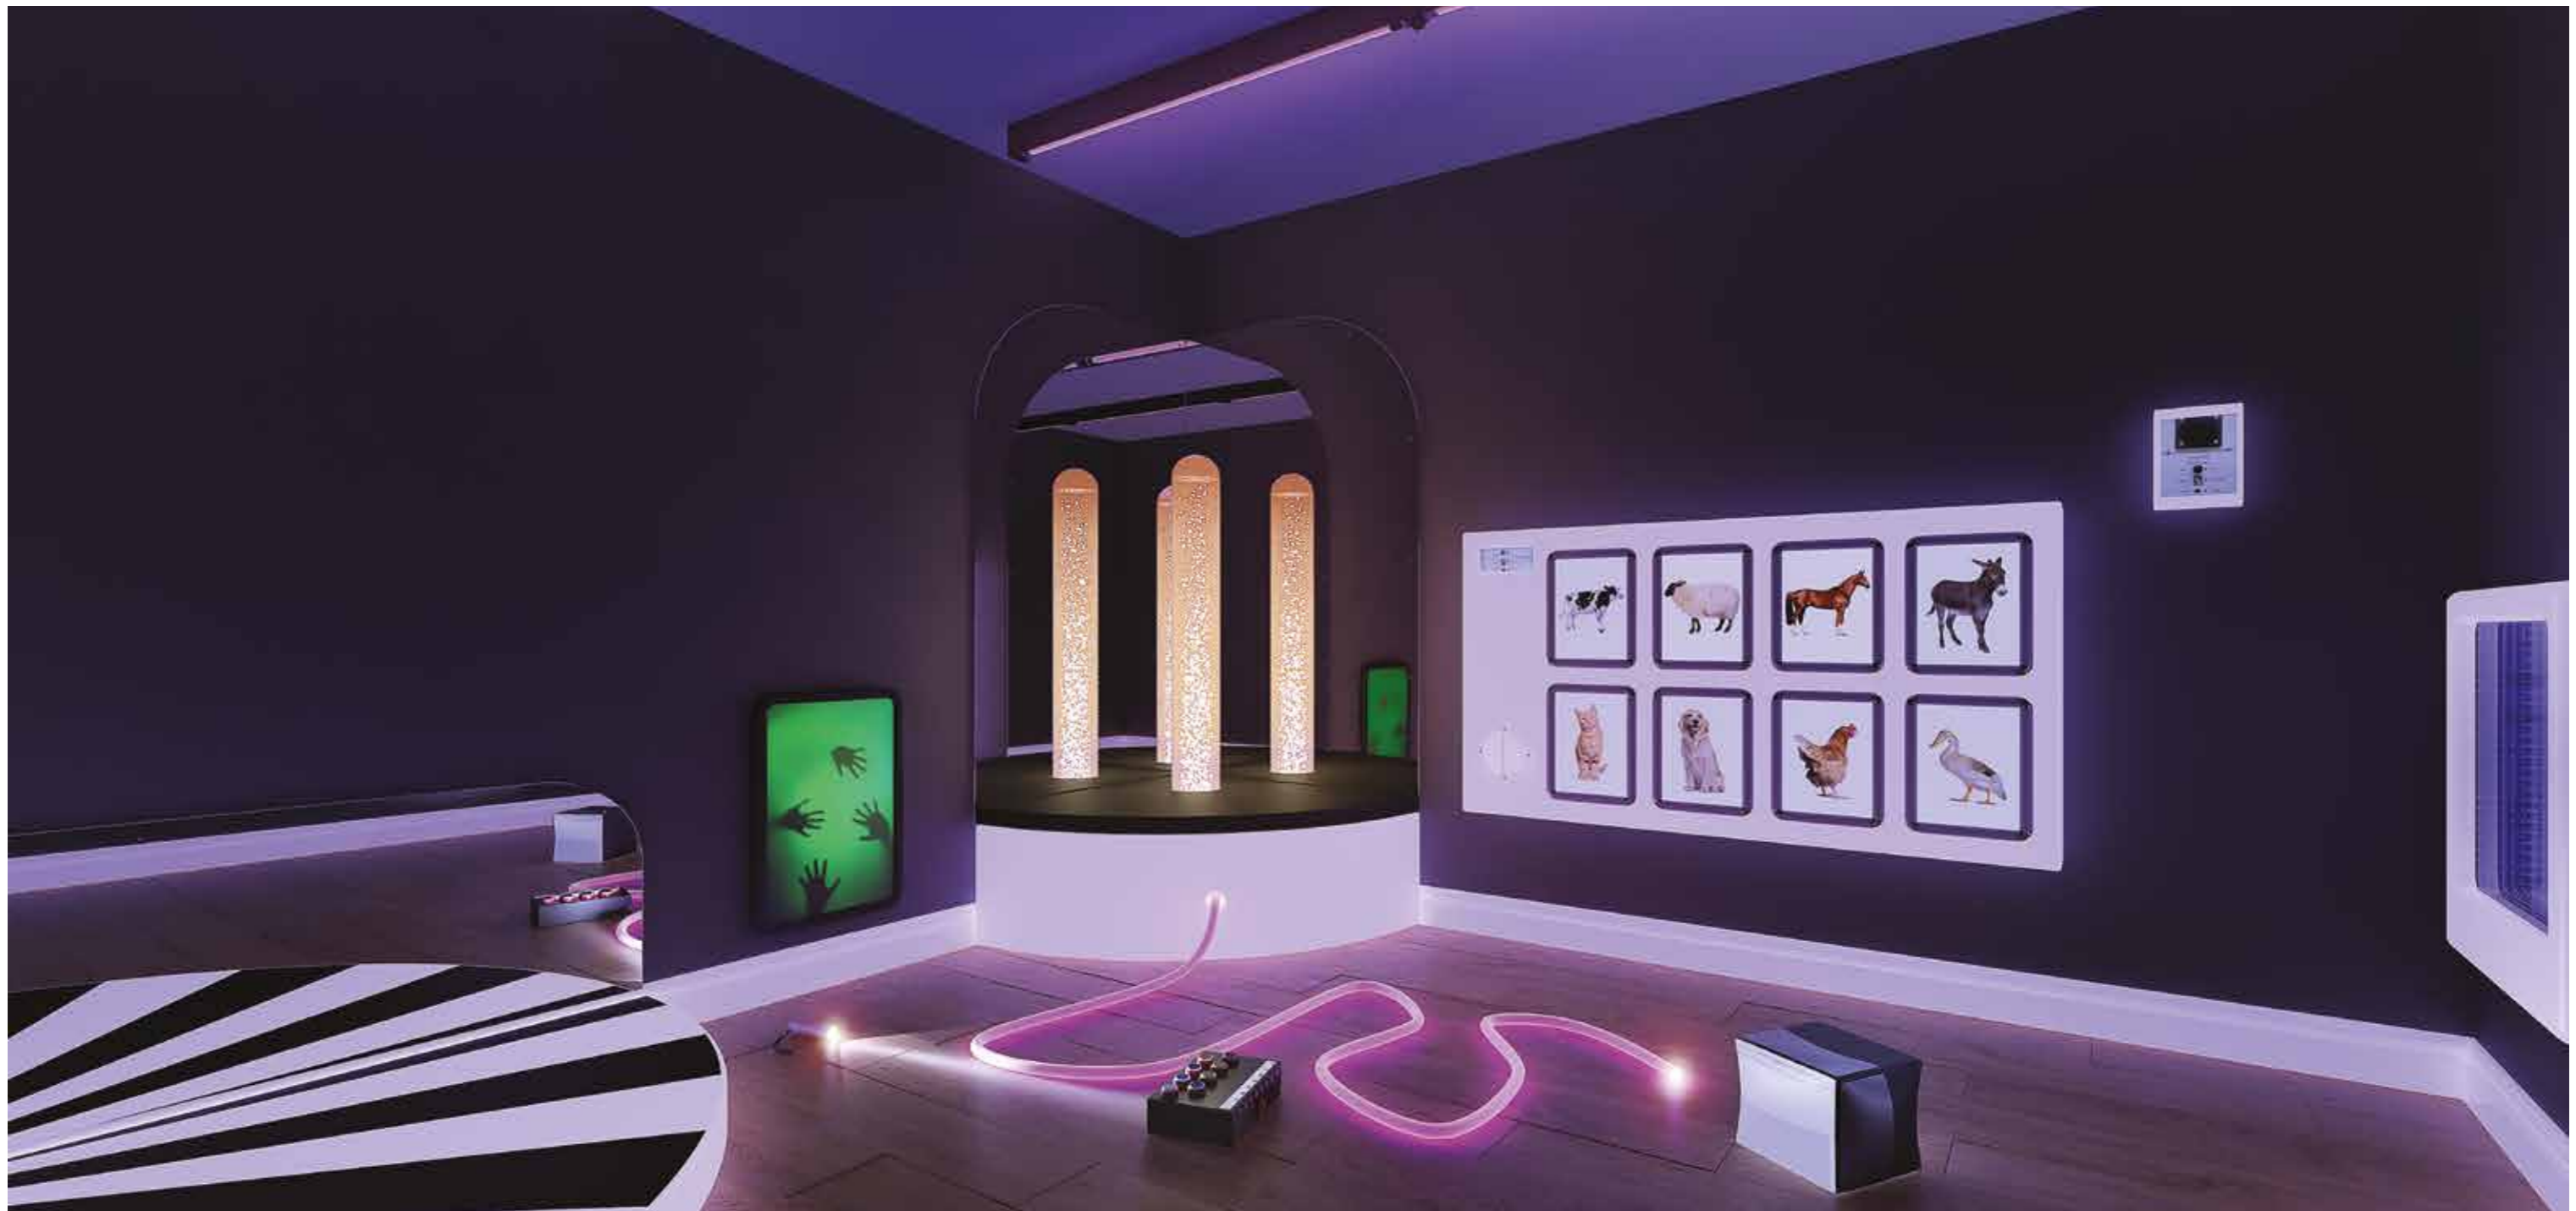

The incorporation of interactive soft play in this room transforms it into a world of sensory adventure. From the movement of the wobble board and see-saw, to the interactive slide that makes a sound as you use it to enter the colour-changing ball pool; the rewards for interaction mean that users will be more likely to engage with the environment, thereby continuing to practice their gross motor skills and so further develop their vestibular and proprioceptive senses. All Experia Soft Play is made to order in your choice of colours, please see pages 92-93.

Uses

Balance, Colour Recognition, Communication Skills, Gross Motor Skills, Hand/Eye Coordination, Physical, Switching Skills.

For a full list of items included in this package, please see pages 76-83.

Yinyáng

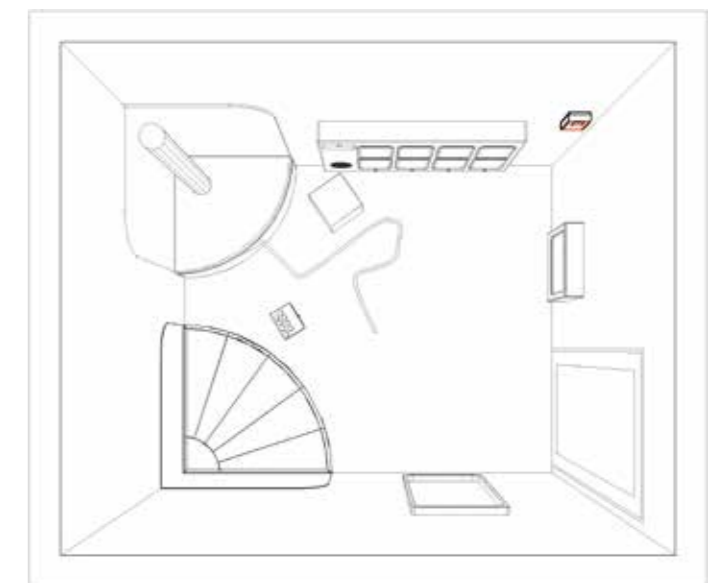

The low vision sensory room

Ideal for those with a visual impairment, this package features soft furniture with contrasting colours and wireless control of the bubble tube, fibre optics and more. Bright and vibrant colours are seen when products are exposed to UV light giving a stark response. This package provides visual challenges and eye-catching fun that inspires visual interaction and development.

Uses

Cause and Effect, Communication Skills, Concentration, De-escalation, Hand/Eye Coordination, Interaction & Relaxation, Switching Skills.

For a full list of items included in this package, please see pages 76-83.

Chiaroscuro

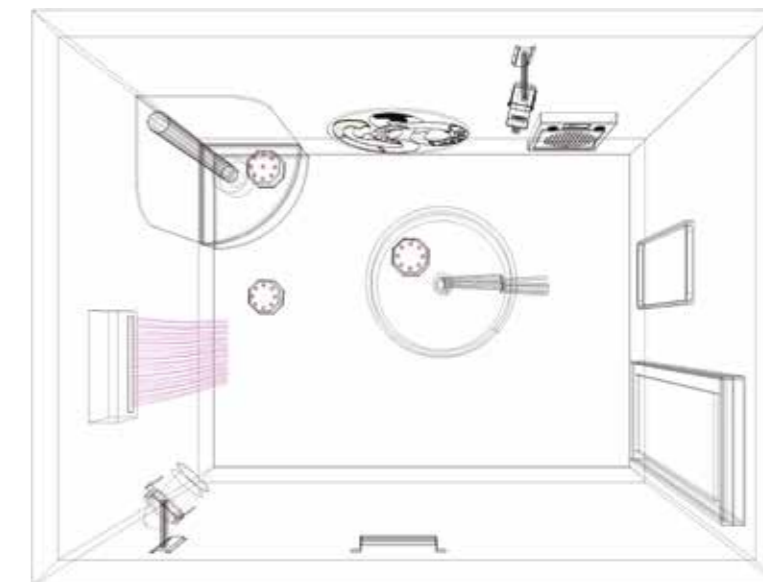

The UV dark room

This package's UV glow and contrasting colours provide an exciting sensory experience suitable for all users, including those with visual impairments. The variety of textures on the UV tactile disc are great for low vision users, and also help develop an understanding of different textures in those both hyper- and hypo-sensitive to touch. With a UV take on some of our most popular sensory products, this room also comes with a black pop-up tent in which to hide away with the resource box's light-up toys and maximise their effects.

Uses

Cause and Effect, Colour Recognition, Concentration, Development of Choice, Fine Motor Skills, Gross Motor Skills, Hand/Eye Coordination, Interaction & Relaxation, Number Recognition, Social Interaction, Storytelling, Switching Skills, Theming, Tracking Skills, Turn-Taking, Tactile.

For a full list of items included in this package, please see pages 76-83.

Karvonen

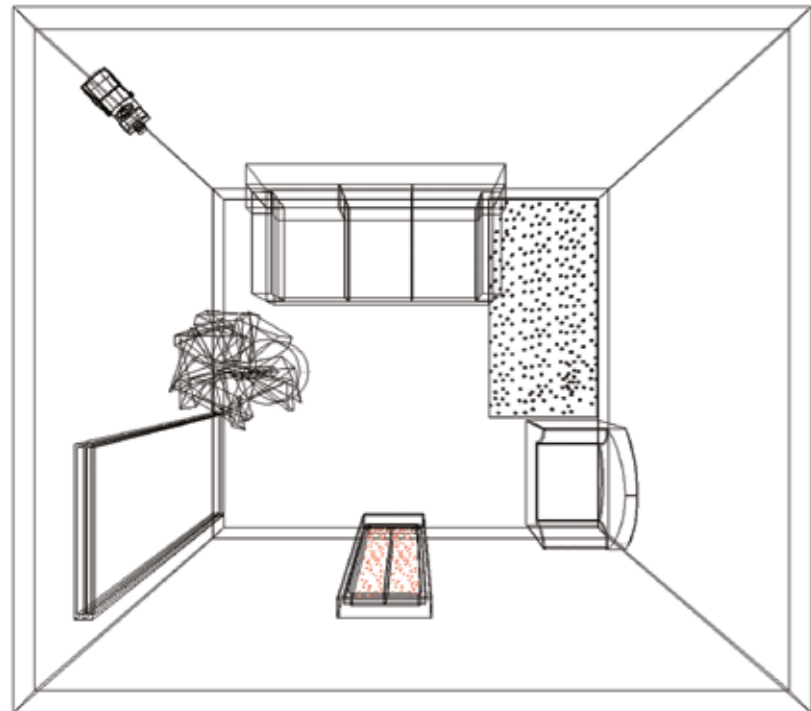

The sensory room for those with dementia

A calming space designed specifically with older users in mind, this package enables the integration of gently soothing multisensory products into any room in a care home, hospital or hospice in order to create a serene but familiar environment for relaxation. The package comes complete with a hardwearing park chair in which to sit and enjoy the mesmerising LED lighting effects as well as your own choice of music for reminiscence through the recessed Bluetooth-enabled speakers.

Uses

Calming, De-escalation, Reminiscence.

For a full list of items included in this package, please see pages 76-83.

Zoladz

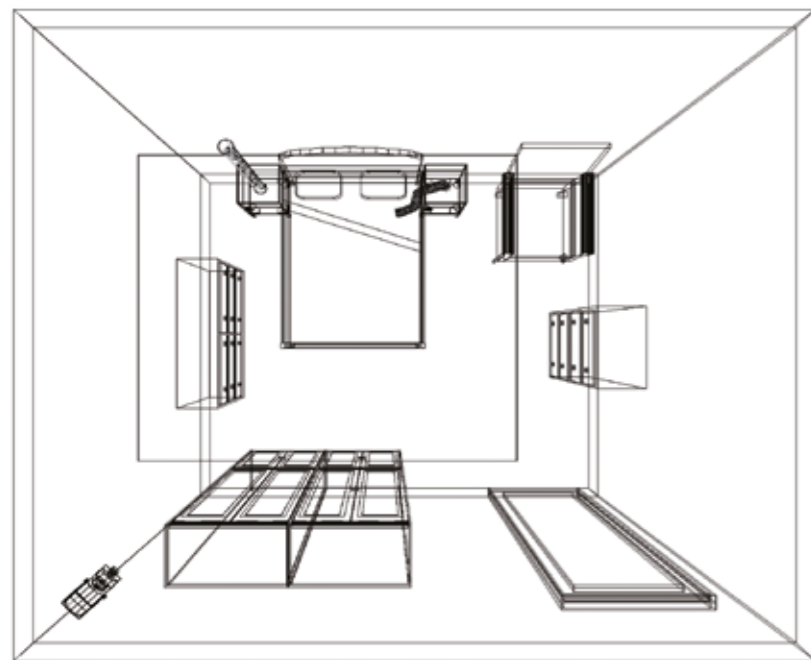

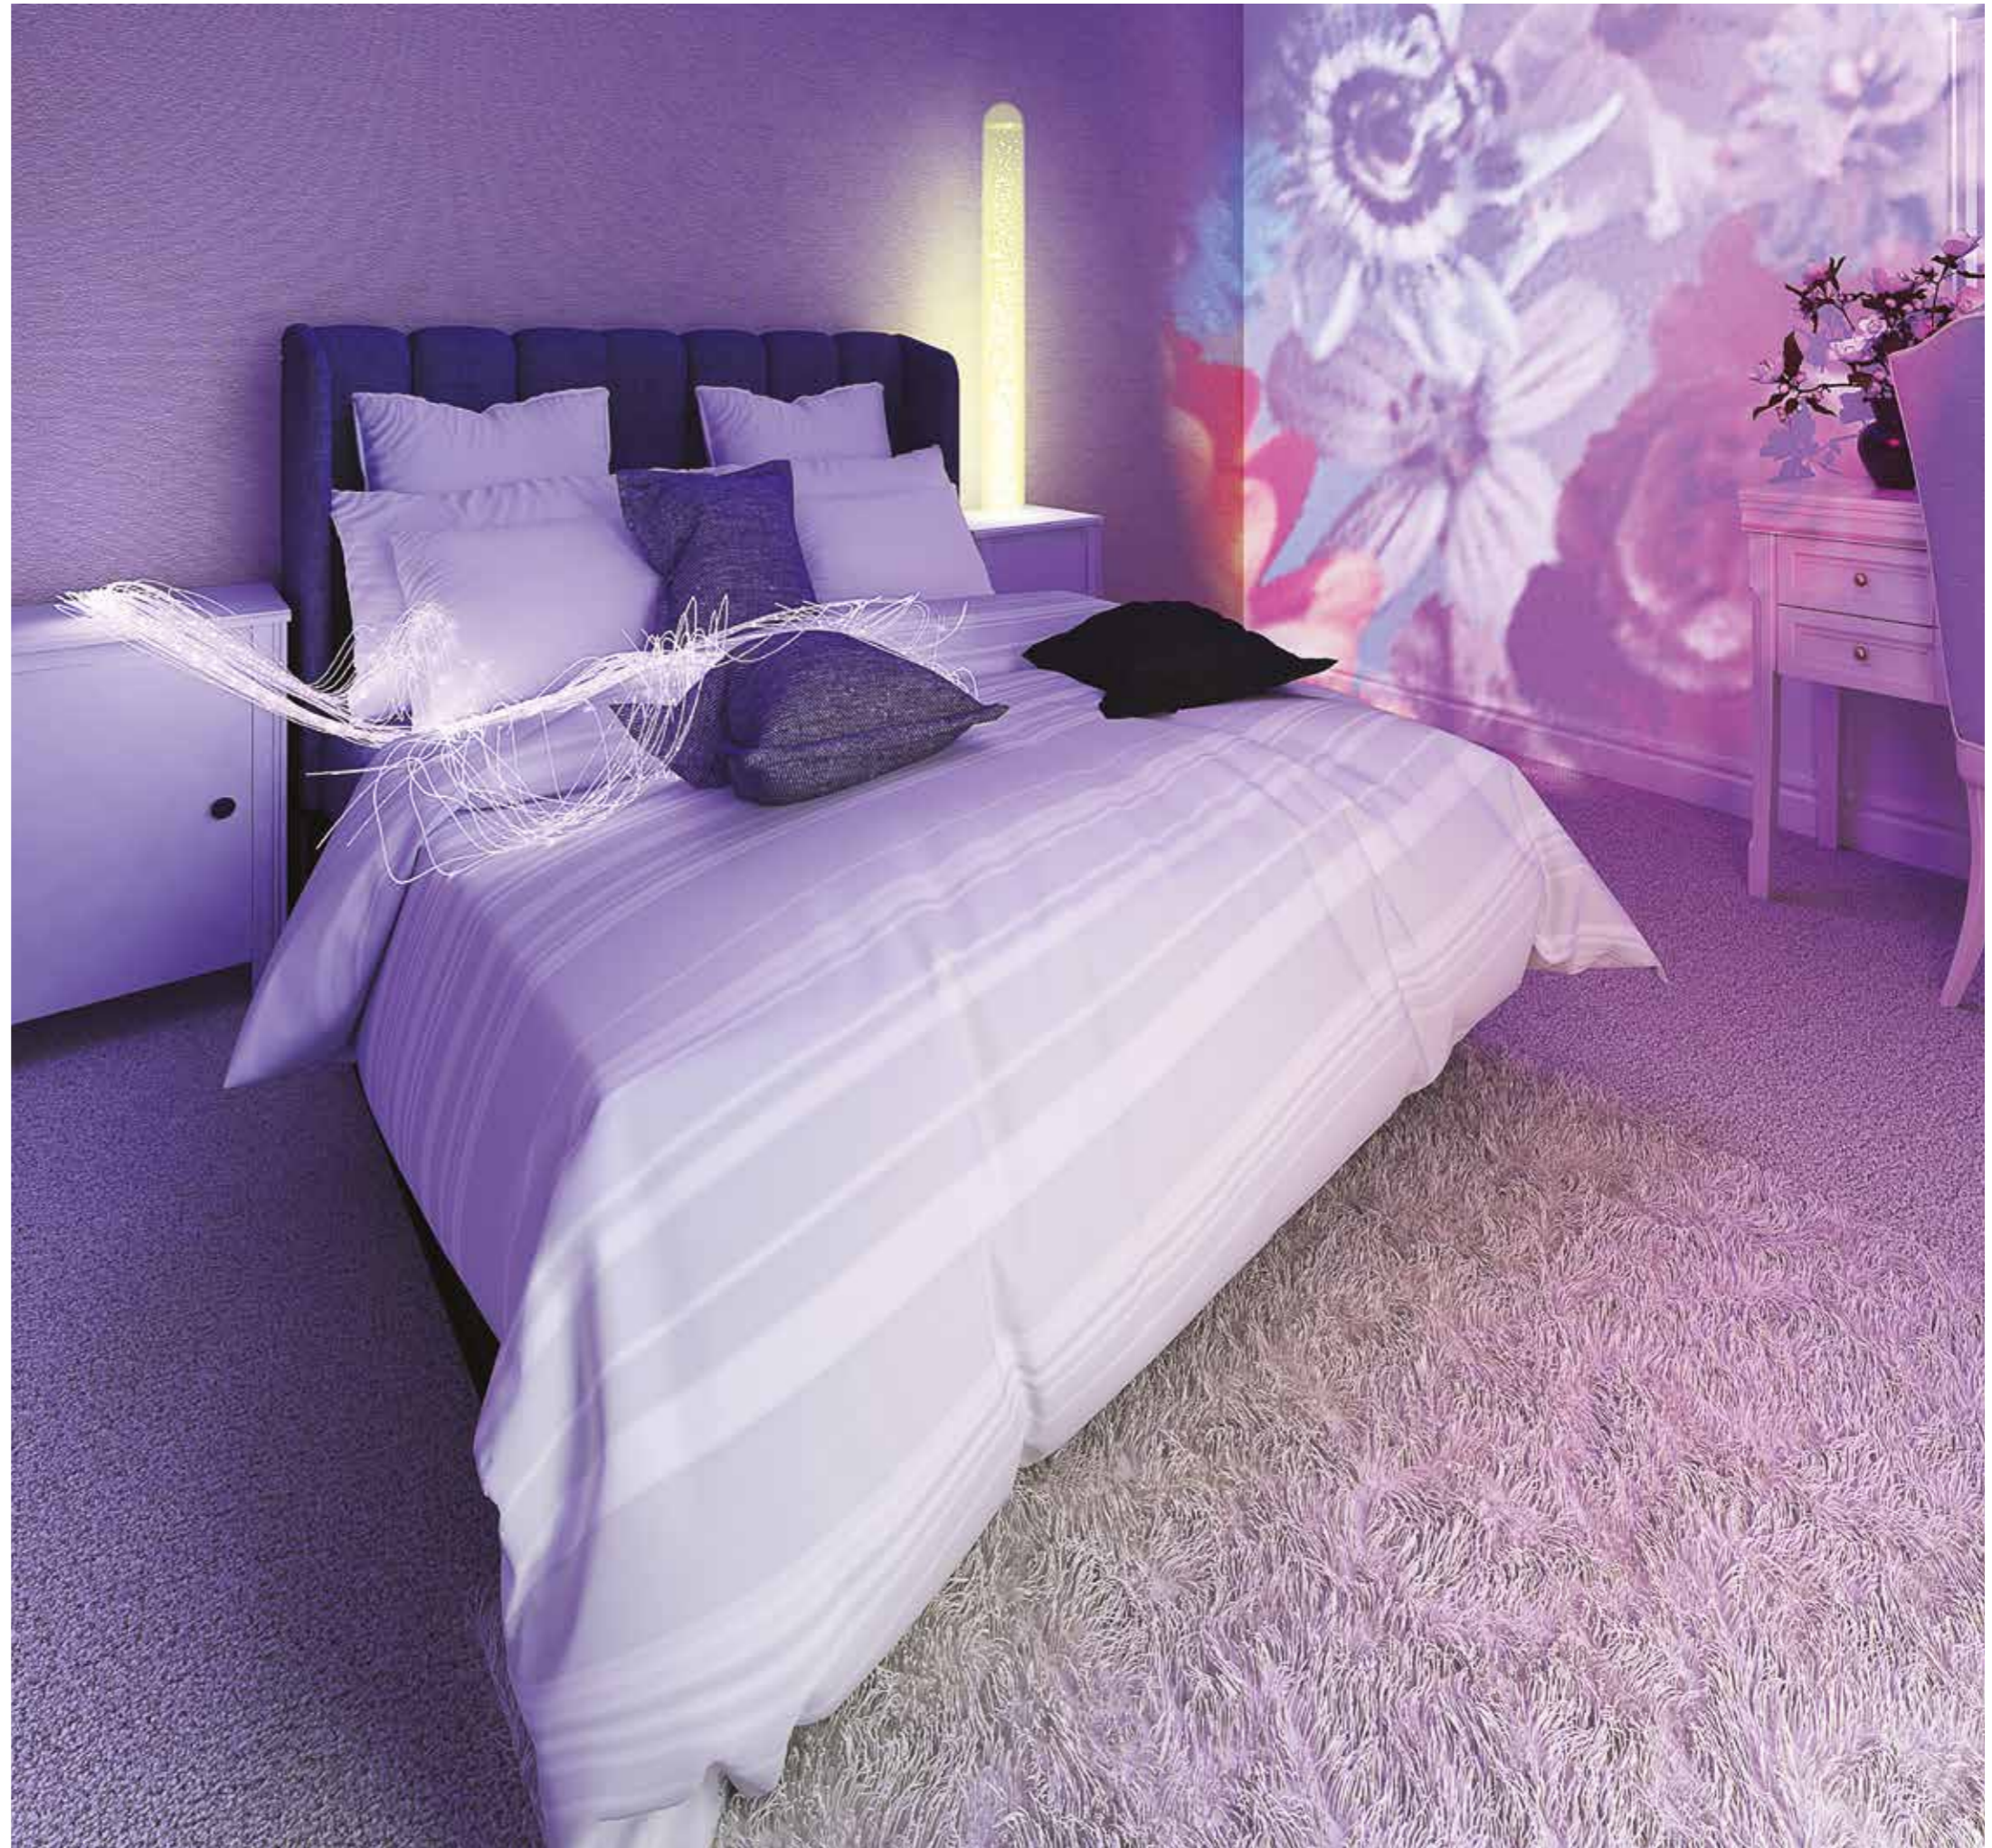

The calming sensory bedroom for those with dementia

This package brings the calming sensory experience direct to the bedroom. Users can relax as they lie in bed and immerse themselves in the slowly colour-changing lights whilst listening to calming sounds... bliss! Helps to distract and de-stress prior to an anxiety inducing procedure or simply allow the experience to help them fall asleep.

Uses

Calming, De-escalation.

For a full list of items included in this package, please see pages 76-83.

Glinda

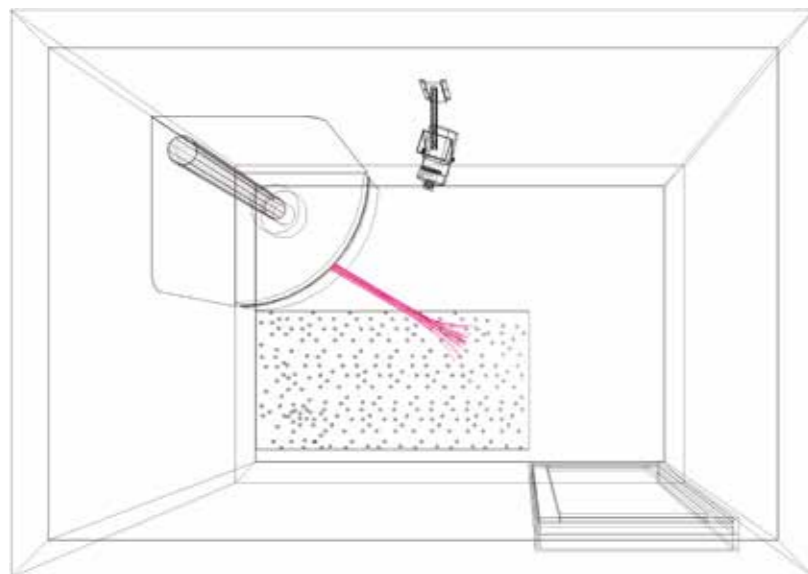

The sensory room in your home

Create your own calming sensory space in the comfort of your home with this compact package that easily integrates into the corner of any room. The perfect place to relax and de-escalate when life or specific situations become overwhelming, the room features a colour-changing bubble tube complete with corner mirrors and plinth seat, plus a fibre-optic carpet, fibre-optic strands and a silent Aurora projector bundle with three rotating image wheels, so the choice of soothing sensory effect is all yours.

Uses

Calming, De-escalation.

For a full list of items included in this package, please see pages 76-83.

Juxta

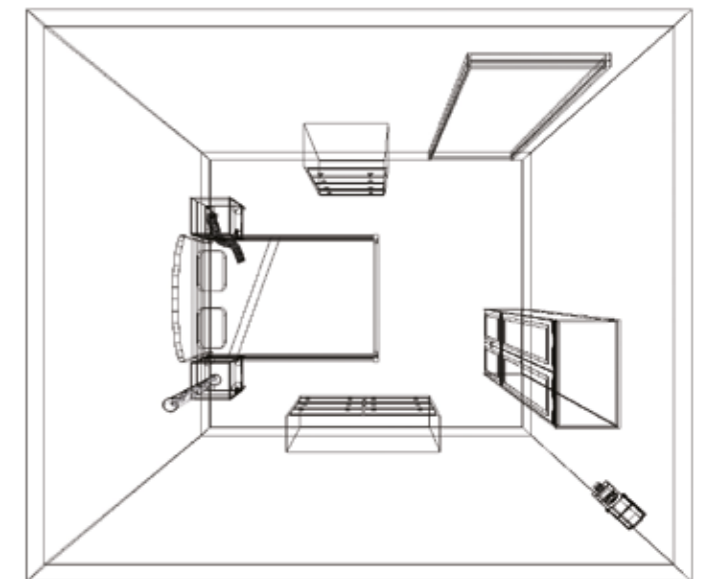

The tranquil sensory bedroom in your home

This package brings the calming sensory experience direct to the bedroom. Set in the familiar surroundings of their own bedroom, users can immerse themselves in the slowly colour-changing lights whilst listening to their own choice of calming music... bliss! Helps to distract and de-stress prior to an anxiety inducing procedure or simply allow the experience to help them fall asleep.

Uses

Calming, De-escalation.

For a full list of items included in this package, please see pages 76-83.

Brahman

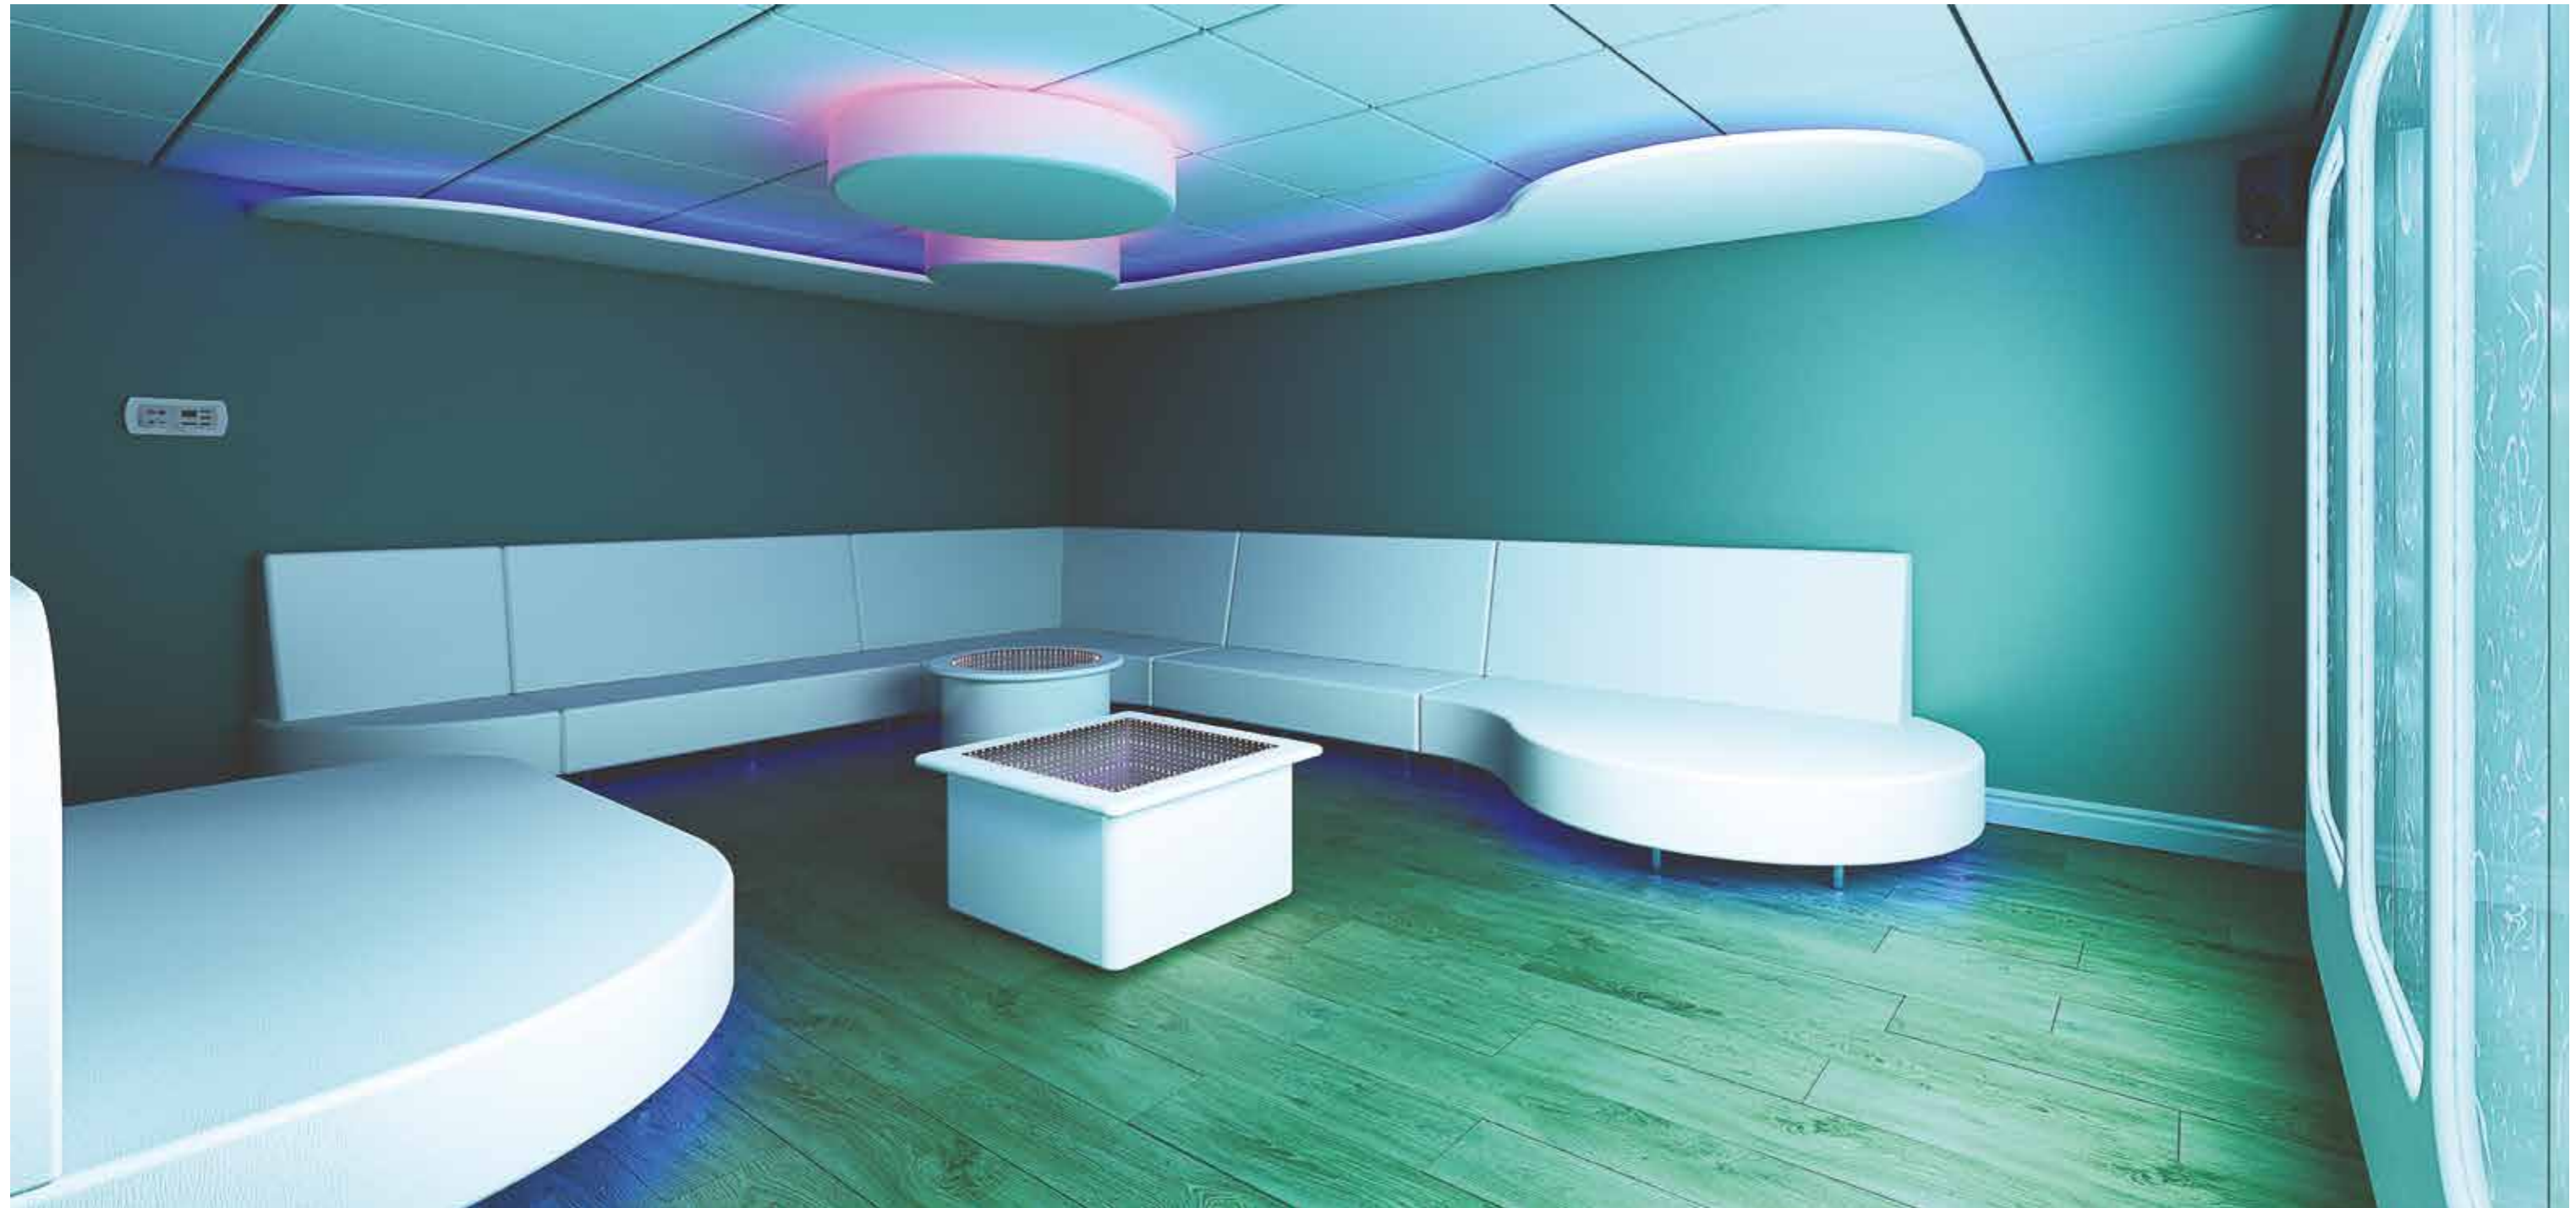

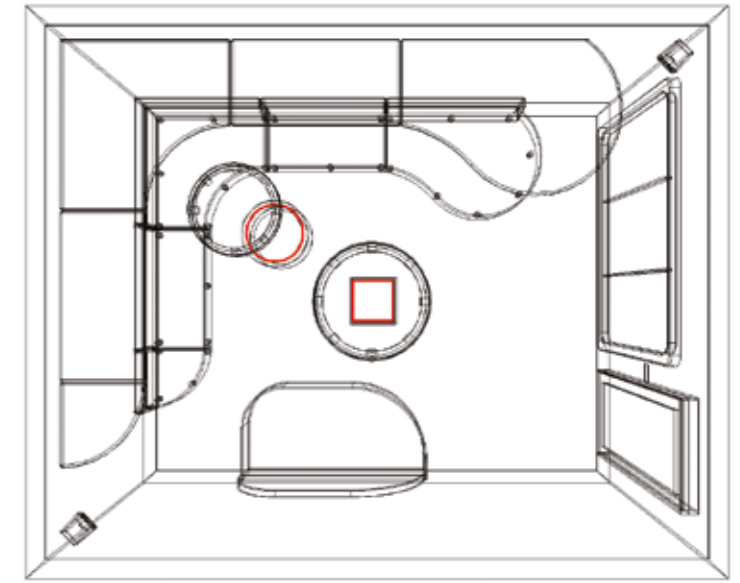

The teenagers' hangout: the sensory lounge

Designed specifically for young adults and teenagers, this stylish room package offers a more age-appropriate sensory solution for teenage users who need their own sensory space, distinct from the childish associations with some sensory rooms. Thanks to the iConverter, all the iRiS equipment in the room, from the infinity coffee tables, which endlessly reflect any object you place on them, to the vibro plinth, giant bubble wall, and stylish LED ceiling shapes, can all be controlled from an iPad or iPhone, using one of the 12 different modes on the free Experia app... And the Bluetooth-enabled wall-mounted stereo speakers allow users to play their own choice of music.

Uses

Cause and Effect, Colour Recognition, Communication Skills, Concentration, Development of Choice, Fine Motor Skills, Gross Motor Skills, Social Interaction, Storytelling, Switching Skills, Theming, Turn-Taking, Tactile.

For a full list of items included in this package, please see pages 76-83.

Respiro

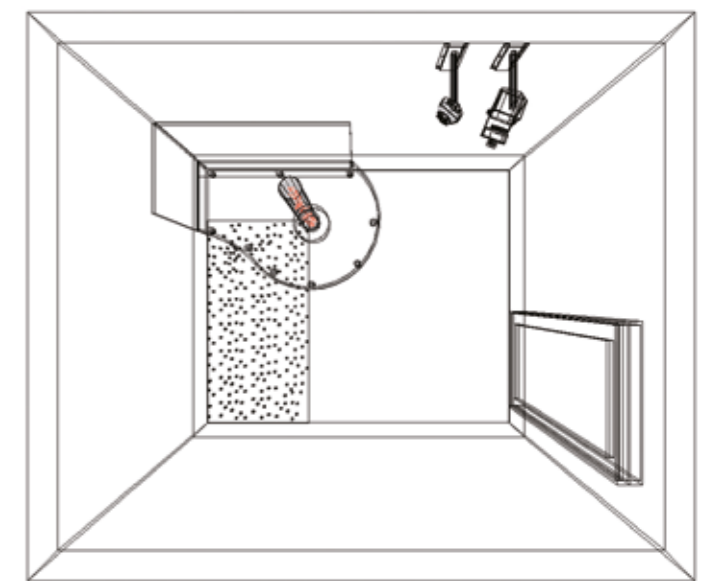

The sensory room in the community

Great for improving accessibility at sports and entertainment stadiums, airports, shopping centres, supermarkets or indeed any other venue that can get busy and overwhelming for people with hidden disabilities such as autism or dementia, this compact, low maintenance package provides a safe haven to help users relax, meaning more people can come to, and stay at, your venue. Can be tailored to match your corporate branding or club colours.

Uses

Calming, De-escalation.

For a full list of items included in this package, please see pages 76-83.

Sulis

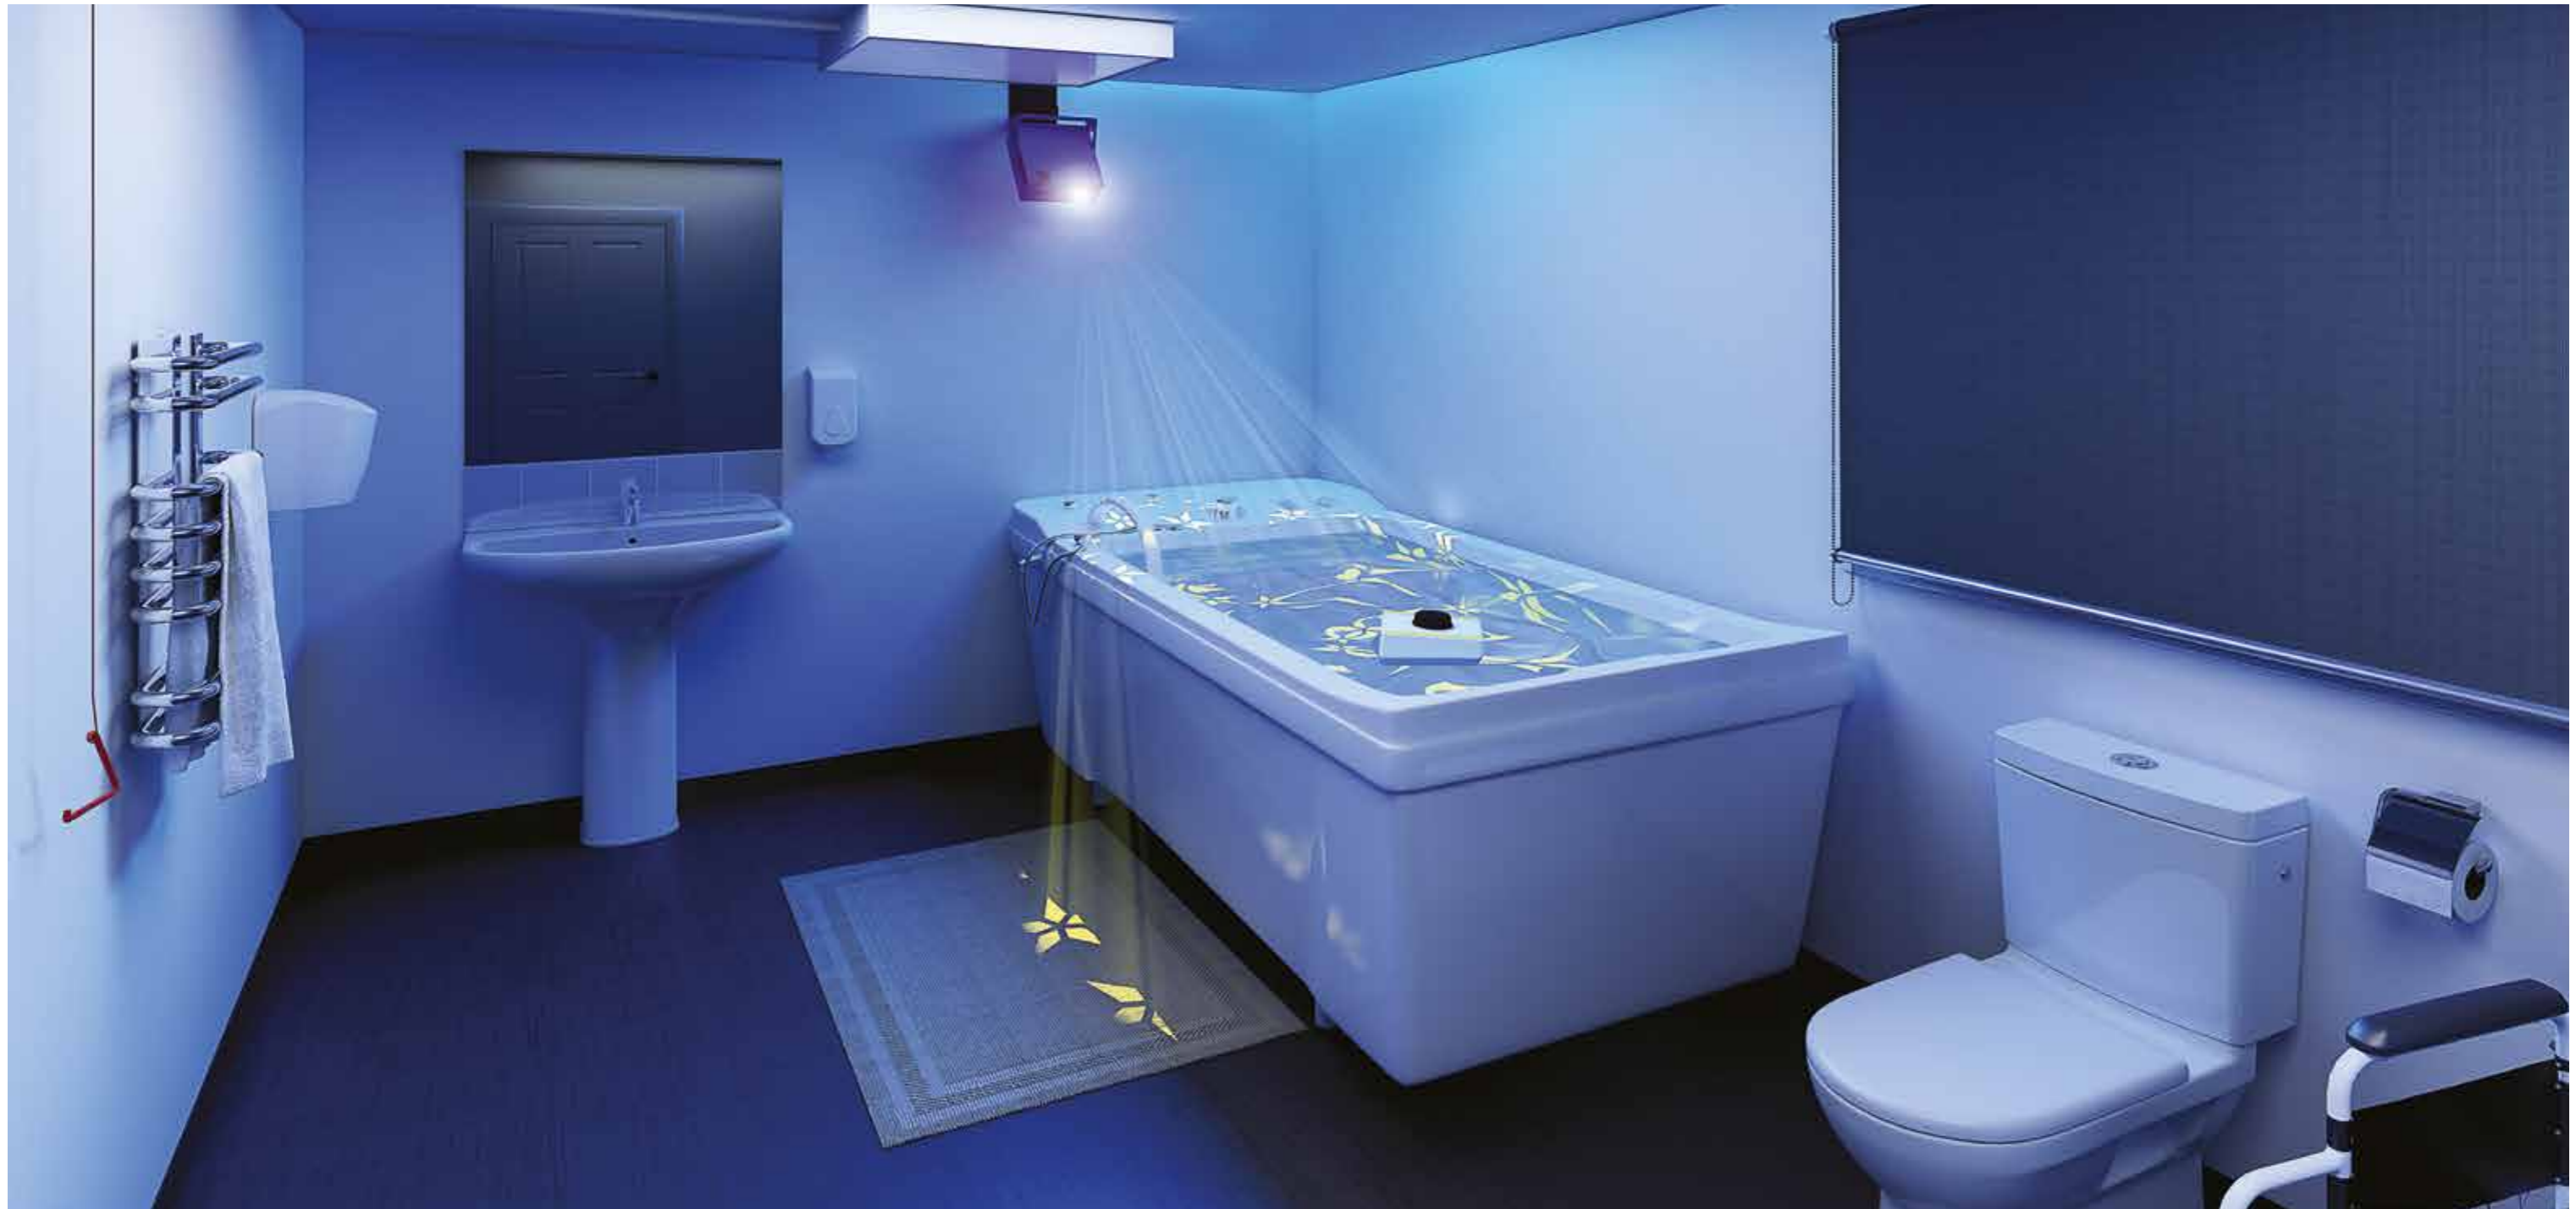

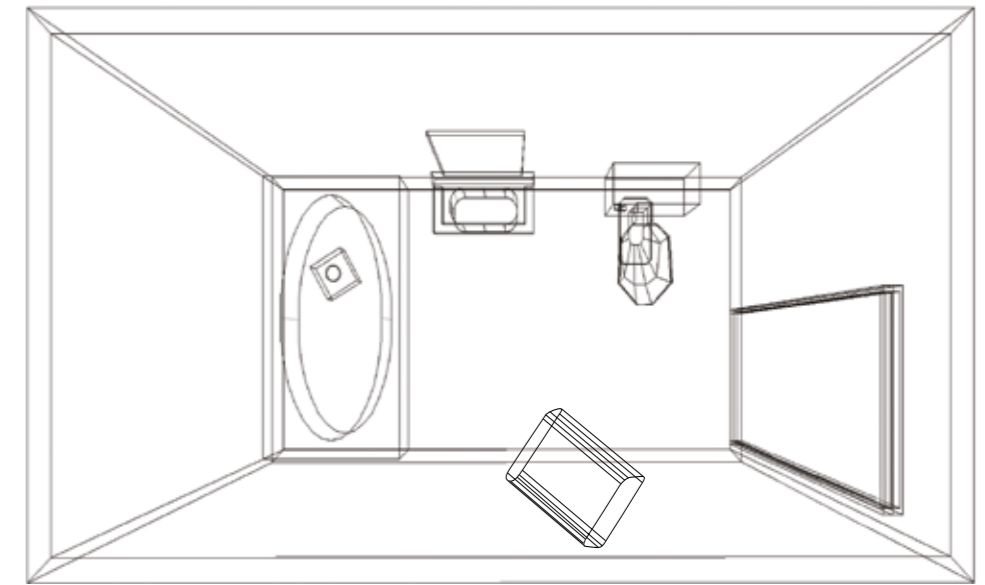

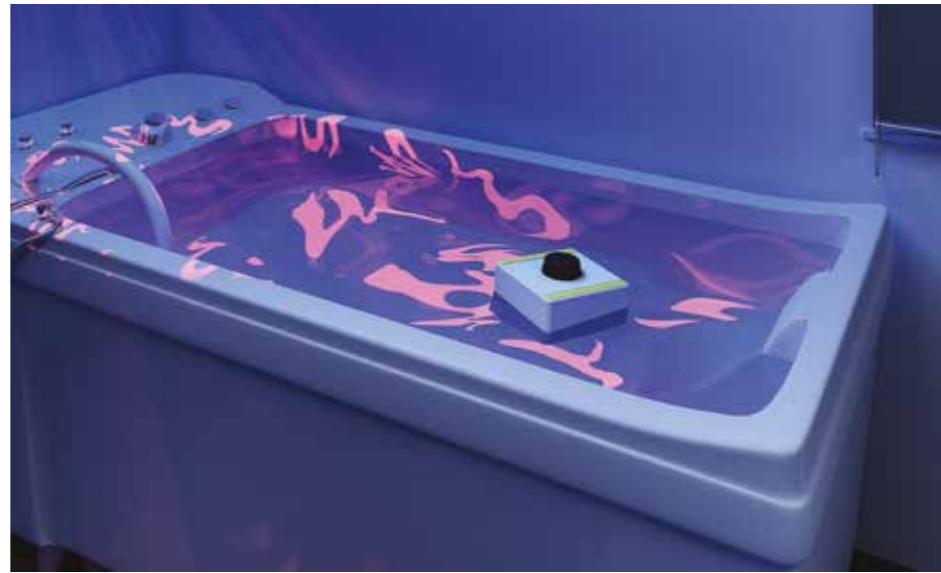

The sensory bathroom

Bathtime is a great opportunity to provide rest and relaxation, helping muscles to relax and reducing pain. When combined with the colour changing lights and shapes of this bathroom package, the effect is dramatically enhanced. Alternatively, for those who find bath time extremely stressful, the distraction of the interactive colour and shape changes can be invaluable in reducing tension and anxiety.

Uses

Calming, Cause and Effect, Colour Recognition, Distraction Therapy, Gross Motor Skills, Shape Recognition, Theming.

For a full list of items included in this package, please see pages 76-83.

Hammam

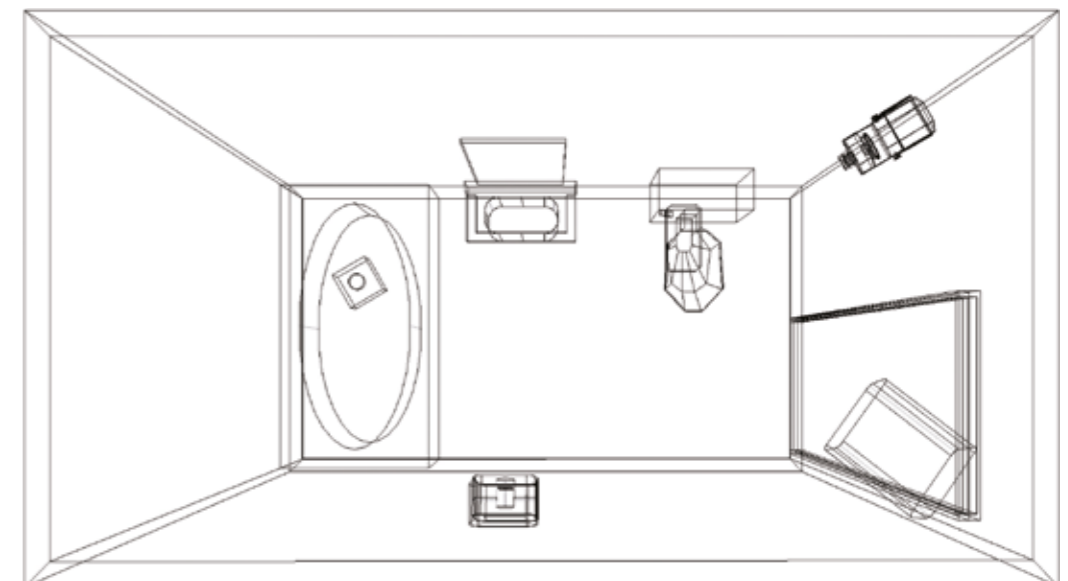

The premium sensory bathroom

From the rotating projection that helps soothe and calm, to the distraction of the bright fibre-optic widebore suitable even for those with extremely low vision, this package is ideal for relaxation. The calming effect is enhanced even further with your own choice of music through the Bluetooth amplifier and speakers. The user can change the colour of the room using the wireless floating switch, making this package great for interaction and theming as well.

Uses

Calming, Cause and Effect, Colour Recognition, Distraction Therapy, Gross Motor Skills, Shape Recognition, Theming.

For a full list of items included in this package, please see pages 76-83.

Atlantis

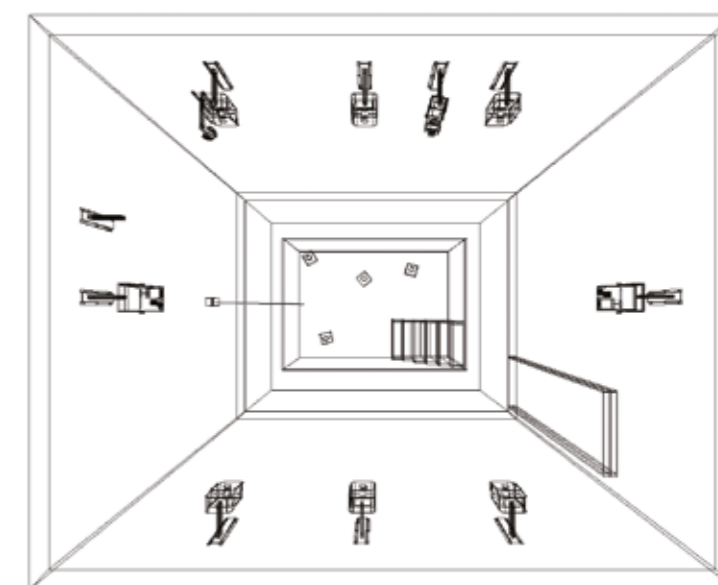

The sensory pool

Transform your pool into a multisensory experience with this package, making hydrotherapy and movement development more engaging with a variety of lighting and projection effects. Develop gross motor and physical skills in an exciting, stimulating environment which is fully controlled by the user through the wireless floating switches.

Uses

Cause and Effect, Colour Recognition, Development of Choice, Gross Motor Skills, Interaction & Relaxation, Physical Skills, Shape Recognition, Switching Skills, Theming, Tracking Skills.

For a full list of items included in this package, please see pages 76-83.

Poseidon

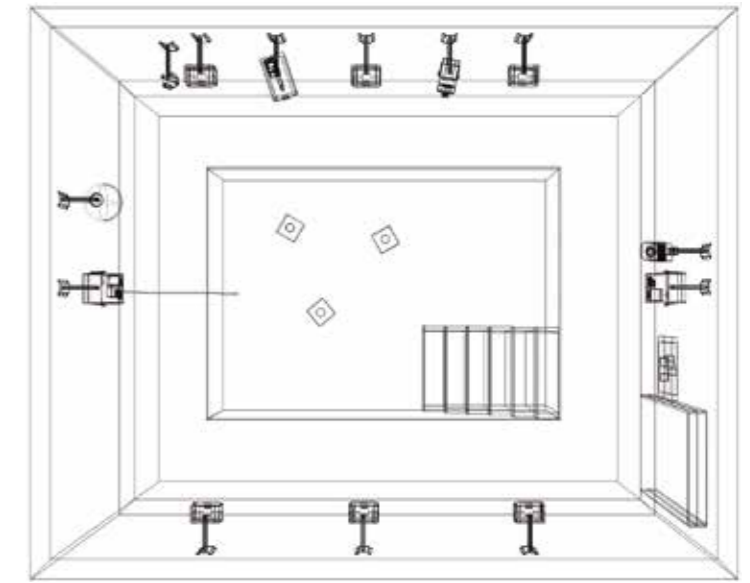

The computer-controlled sensory pool

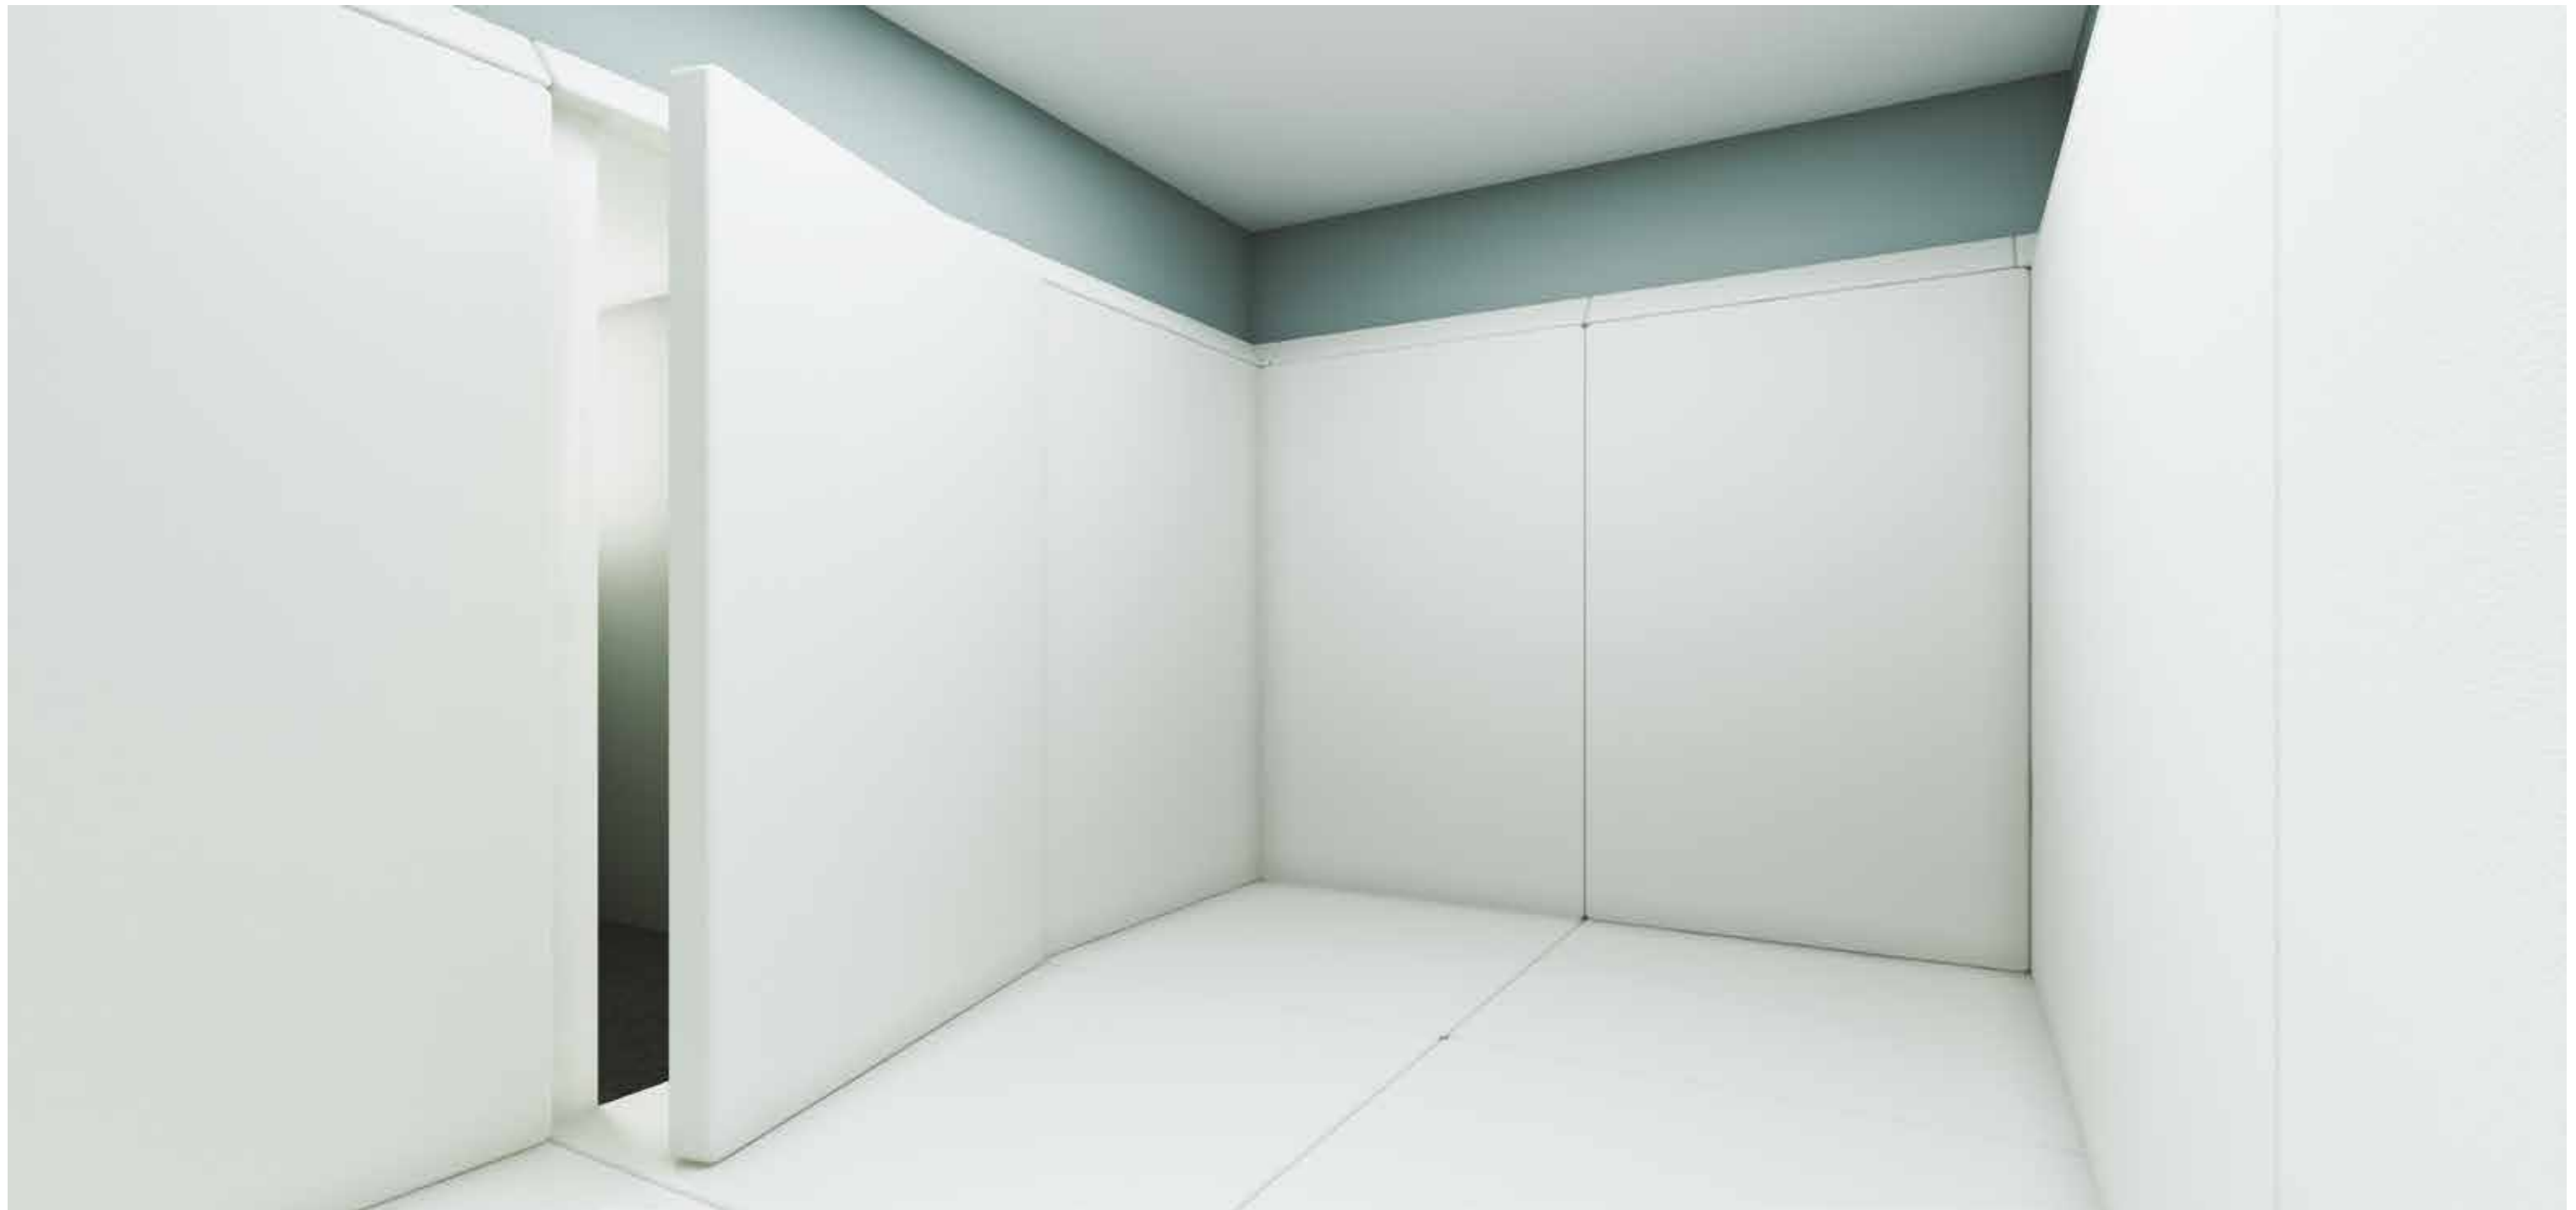

Transform your pool into a spectacular performance of sound and light, controllable through our IP-rated low voltage touchscreen suitable for pool environments. The IRiS software is packed full of themes designed for learning, calming and reminiscence, each of which can be controlled by the user with one of the wireless floating switches. A superb atmosphere for theming, storytelling, social interaction and above all, fun!

Uses

Cause and Effect, Colour Recognition, Development of Choice, Gross Motor Skills, Hand/Eye Coordination, Interaction & Relaxation, Number Recognition, Physical Skills, Shape Recognition, Social Interaction, Switching Skills, Theming, Tracking Skills.

For a full list of items included in this package, please see pages 76-83.

Sangfroid

The de-escalation room

Sometimes we all need some time and space but for people with special needs it can be hard to express emotions until they hit breaking point. This wonderful package has been designed as a safe place to go for those who need to de-escalate and calm. Padding covering the walls and floor ensures users can't hurt themselves whilst in the room.

Uses

Calming, De-escalation.

For a full list of items included in this package, please see pages 76-83.

Zen

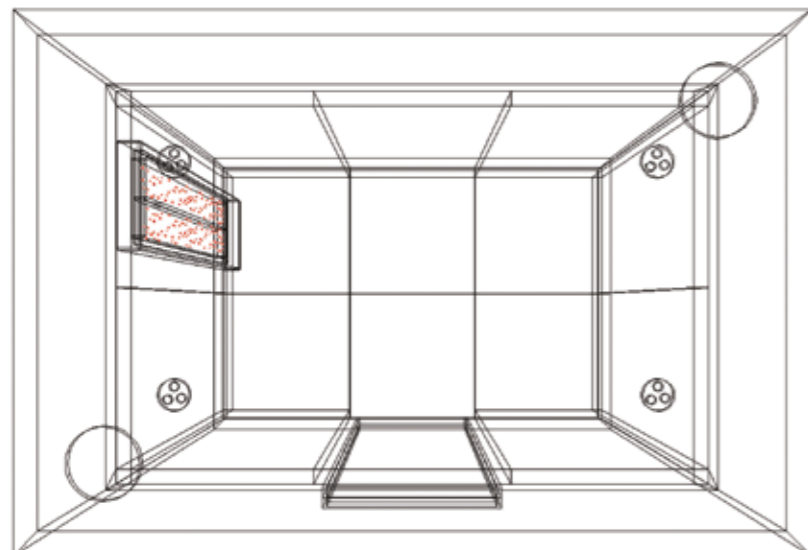

The premium de-escalation room

The next step up from our standard de-escalation package, this has the added benefits of slowly colour changing lighting and a choice of music, perfect for calming and relaxation. Allow the user to hide away and self-regulate in a safe environment until they are ready to face the world again.

Uses

Calming, De-escalation.

For a full list of items included in this package, please see pages 76-83.

Uitwaaien

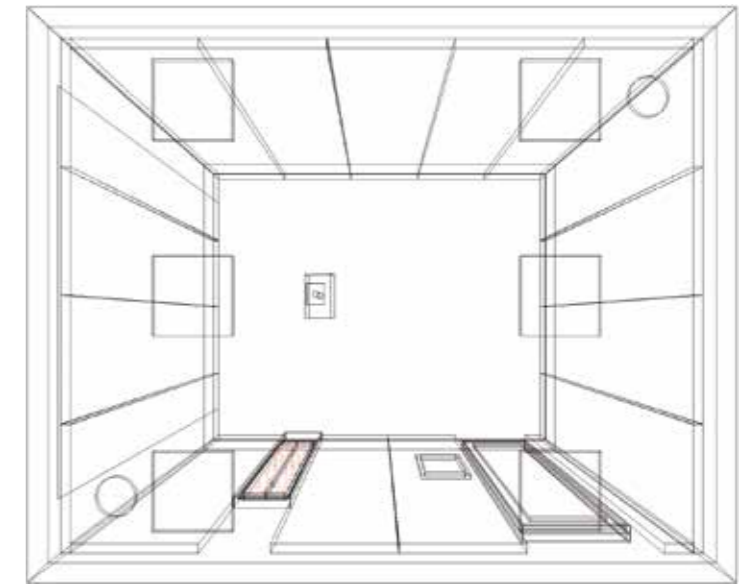

The specialist high dependency de-escalation room

A distracting immersive experience for users who need that additional support, this is the ultimate in de-escalation. What calms and relaxes one person is different from the next, so this package allows you to create themes to suit each individual through the use of synchronised colour change, music and video. It also features soft padded walls and floors to allow users to release their negative energy, which when combined with specialised themes, makes this package the ultimate in de-escalation.

Uses

Calming, Communication Skills, De-escalation, Distraction Therapy, Reminiscence.

For a full list of items included in this package, please see pages 76-83.

Soma

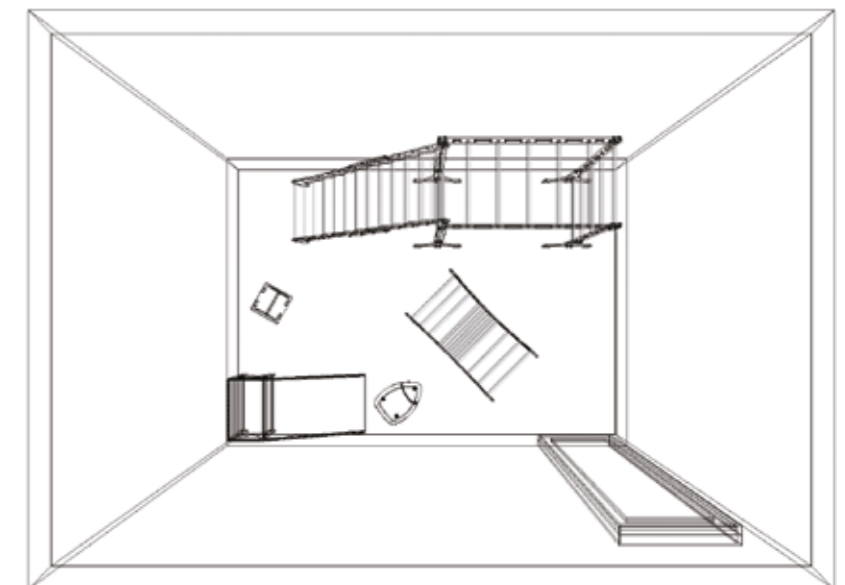

The sensory integration room

Develop a well-rounded range of sensory integration skills for use in the real world with this package. The wide variety of physical challenges offered by this equipment teaches users to process and organise proprioceptive inputs to enable them to interact effectively with their environment. As well as promoting balance and coordination, the bridge can be turned upside-down into a rocking arch to enable users to feel the pull of gravity and develop movement perception. And the body roller provides deep pressure therapy and helps users to relax as they crawl between the tension-adjustable, fully padded rollers.

Uses

Balance, Gross Motor Skills, Hand/Eye Coordination, Interaction and Relaxation, Physical Skills.

For a full list of items included in this package please see pages 76-83

Kanga

The rebound therapy room

A dedicated room in which to provide rebound therapy, this package comes complete with soft wall and floor padding for increased safety. The trampoline facilitates movement, promotes balance, improves fitness and exercise tolerance, and can be used to increase or decrease muscle tone. It could also be used to improve communication and concentration skills and to aid relaxation and sensory integration. All Experia Soft Play is made to order in your choice of colours, please see pages 92-93.

Uses

Balance, Physical Skills, Rebound Therapy.

For a full list of items included in this package, please see pages 76-83.

Wanderlust

The immersive room

Take the multisensory adventure of Experia's MiLE system a step further with the immersive experience of this package's four-way integrated projection.

Immerse yourself with images and video on three walls and even the floor, then enhance the multisensory experience by using the intuitive IRiS Room Director Software to enable users to control the themes with numerous wireless switches to really bring the experience to life and feel as if you're really there!

Uses

Balance, Calming, Cause and Effect, Colour Recognition, Communication Skills, Concentration, De-escalation, Development of Choice, Distraction Therapy, Emotional Development, Fine Motor Skills, Gross Motor Skills, Hand/Eye Coordination, Interaction & Relaxation, Number Recognition, Physical Skills, Reminiscence, Shape Recognition, Social Interaction, Sound/Music Therapy, Storytelling, Switching Skills, Theming, Tracking Skills, Turn-Taking, Tactile.

For a full list of items included in this package, please see pages 76-83.

Just Colour - for Sensory Rooms

Soft to touch and very comfortable, Just Colour vinyl is ideal for use wherever a person will sit or lie, such as on soft plinths, seating or floor padding. It is REACH compliant, phthalate free, anti-microbial and compliant with BS5852 Ignition Source 7, BS7176 Medium Hazard and BS EN1021 (1 and 2) for fire retardancy. It comes in a range of 14 bright and elegant colours and has been tested to 500,000 rubs.

Choose your colour and make it your own!

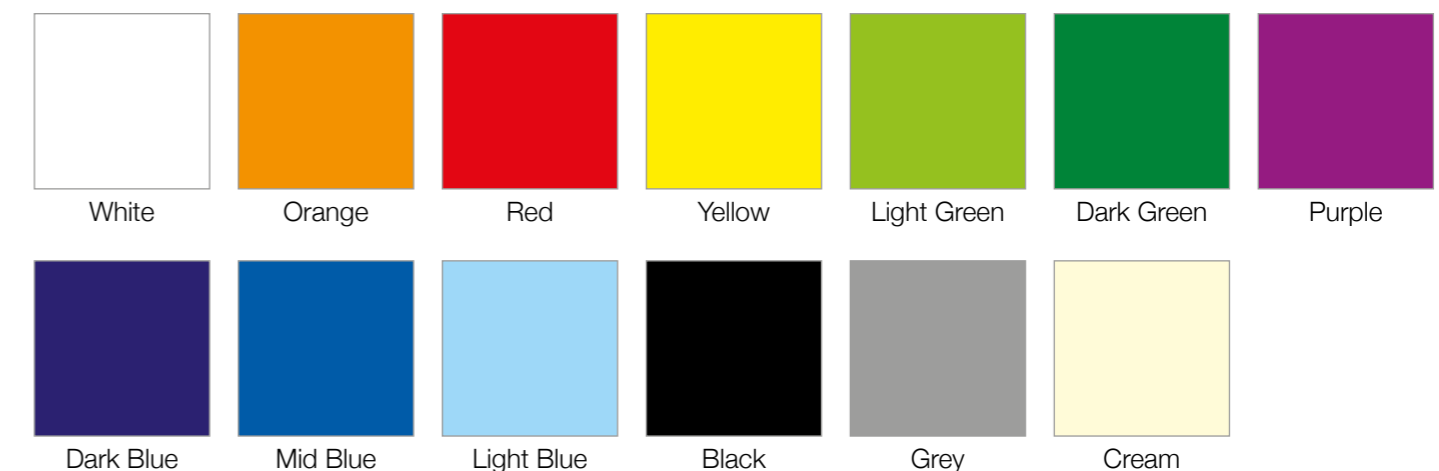

Our soft furniture, padding and plinths can be manufactured in various colours to suit the user, or to reflect your corporate colours. However, we recommend using Jasmine White in all sensory rooms so that the colour from the lighting effects can illuminate the padding.

Any colour works well in the Soft Play or Sensory Integration rooms, so feel free to choose from our Pure Strength range.

We use the finest vinyl covering to ensure your equipment is tough, durable and great to touch!

Pure Strength – for soft play or sensory integration rooms

Extremely durable and very tough, Pure Strength vinyl is purposely designed for challenging environments. It is manufactured from the highest quality plasticised PVC polymer directly coated onto both sides of a UK woven nylon substrate base. It comes in a range of 13 bright colours and has tear strength to BS 3424: 1982: Part 5: Method 7B standard.

Please note that colours shown here are represented as accurately as possible but due to the print process may not be exact. If you require a colour swatch please contact us.

Setting up a Sensory Environment

You've chosen your package, that's great!... but there are other considerations in order to really make it work. And now you've got this far, it makes sense to get everything just right.

The following table gives advice on the whole look of the room from wall colour, floor coverings, ceiling colour, heating, ventilation, storage, lighting levels, electrical plans and more.

But of course, if you're unsure you can always ask your dedicated sensory advisor who will be happy to help.

We are constantly innovating, evolving and improving!

Here at Experia, we never rest. We are constantly inventing, innovating and developing new products.

Say hello to some of our happy customers...

We also look closely at existing products and improve them in any way we can. With this in mind, we reserve the right to change/alter or improve any product without prior notice.

All measurements are approximate and quoted in metres unless otherwise stated. All images are for illustrative purposes only. Colours are as accurate as possible but due to the printing process, may not be 100% exact.
