innovation in every sense

Congratulations on the purchase of your Mini LED Bubble Tube!

The Mini LED Bubble Tube has been designed specifically for people with special needs and should, if used in accordance with these guidelines, offer years of fun!

The Mini LED Bubble Tube is designed to calm and relax an individual in certain settings.

It is the brightest Mini LED Bubble Tube currently available (at time of print) and produces multiple shades of colours when used in calming mode.

Please ensure you read and follow these instructions carefully before operating the unit. Please keep this manual for future reference.

Features

- Ergonomic Design
- Latest LED Technology
- No Lamp Change – LED
- Clear Domed Lid
- Low Voltage – transformer supplied
- Easy upgrade/maintenance
- Durable
- Easy to use

Pack contents

1 x Mini LED Bubble Tube
1 x Clear Domed Lid
1 x Low Voltage Transformer

Getting Started

1. Remove all packaging including clear film around the tube. Please note, the tube may contain a small amount of water, this is completely normal.
2. Place the Mini LED Bubble Tube on a flat solid surface.
3. Carefully fill the bubble tube with water from the top. If you spill any water, please ensure this is cleaned immediately. Do not fill the tube to the top; allow 2 inches (50mm) from the water level to the top of the tube.
4. Connect the DC connector from the low voltage transformer to the socket in the base of the bubble tube.
5. Connect the low voltage transformer to a mains outlet.
6. The Bubble Tube will now illuminate and begin scrolling through many colours.

Please note: Only use the transformer supplied. Use of a different transformer may result in damage to the product and void the warranty. For warranty information please see separate warranty card supplied.

Cleaning and Maintenance

The unit should be cleaned with a damp soft cloth. A non abrasive cleaning agent may be used for stubborn stains. Ensure no liquid enters the base of the unit.

The unit has been designed for use by people with special needs, however this does NOT mean it is unbreakable. You must ensure the unit is not hit with anything and that no one pulls or pushes the unit.

Changing Bubble Tube Water

All bubble tubes require the water in them changed every 4 – 6 weeks to slow the build up of any bacteria.

1. Remove the lid off the column.
2. Carefully tip up the bubble tube and empty the water into a suitable vessel.
3. Refer to the getting started section for filling instructions.

Troubleshooting

Q. The unit doesn't work.

A1. Is it switched on? If so,

A2. Has the unit scrolled through its colours? If so,

A3. Please contact us for further assistance.
